### The project

The overall objective of this project is to support Bulgaria (BG) and Romania (RO) in implementing the Black Sea component of the MSFD CIS WP 2014-2018, addressing the deficiencies and shortcomings identified within the first phase of the coherence and adequacy assessments (Art. 12 of the MSFD), supporting the development of monitoring programmes as well as coordinated Programmes of Measures between BG and RO.

Phase I (ending January 2015) had the following specific objectives, in particular to provide technical and administrative support for:

1. Building the information basis for a more coherent and comparable joint implementation of the MSFD in Bulgaria and Romania.
2. Capacity building activities in the region with view to strengthen the administrative and technical capabilities in Bulgaria and Romania for joint MSFD implementation.
3. Promoting coordination activities within the Black Sea marine region and with other marine regions.

Phase II\* (January-October 2015) has the following specific objectives:

1. Consolidating the information basis
2. Maintaining the information exchange platform

### CBE Brussels

Recently the third Capacity Building Event was organized in Brussels (6-7 May 2015). This workshop aimed to analyse the preliminary short list of common and coordinated measures of Bulgaria and Romania for cost effectiveness and cost benefits. The workshop was attended by the project team, the national coordinators for MSFD implementation in Bulgaria and Romania, specialists on socio-economic cost calculations and was lead by experts from ARCADIS-Belgium and COWI.
