

Data types, code lists and enumerations of EAGLE LandCoverDataset feature type

Data types, code lists and enumerations of EAGLE LandCoverUnit feature type

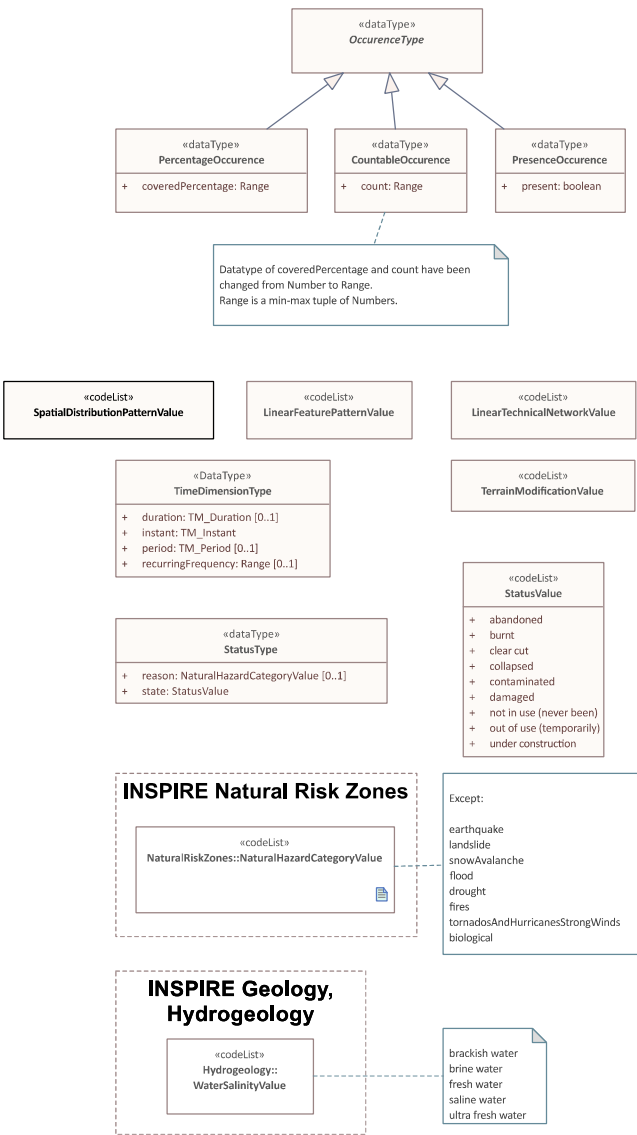

Datatype for the documentation of the spatialResolution (Minimum Mapping Unit for areas or minimum width for lines)

The documentation of minMMU and maxMMU or the minWidth is mandatory if DQ_Scope level=dataset

The main Metadata and Data Quality elements to characterize a LC/LU dataset have been included in the datamodel. Such as: Resolution, MMUmin, MMUmax, min. Width, Overall accuracy (ISO 19157, Table E.6), Commission errors, Omission errors, Significance level, Position accuracy.

Data types, code lists and enumerations of EAGLE LandCoverComponents and SpatialCompositions feature types
