FEES- CS

A Classification System for Final Ecosystem Goods and Services

Wageningen Ecosystem (Services) Workshop - WEW

Dixon H. Landers and Amanda M. Nahlik

US EPA OFFICE OF RESEARCH AND DEVELOPMENT, NATIONAL HEALTH
AND ECOLOGICAL EFFECTS RESEARCH LABORATORY, WESTERN
ECOLOGY DIVISION, CORVALLIS, OREGON

FEGS-CS Key Design Features

- Comprehensive
- Minimally Duplicative
- Identifies **Potential** Beneficiaries (users)
- Facilitates Metric Selection
- Works at Multiple Spatial Scales (with some minor adjustments)

FINAL Services

“components of nature, directly enjoyed, consumed, or used to yield human well-being” *(Boyd & Banzhaf 2007)*

Environmental Class + Beneficiary → FEGS

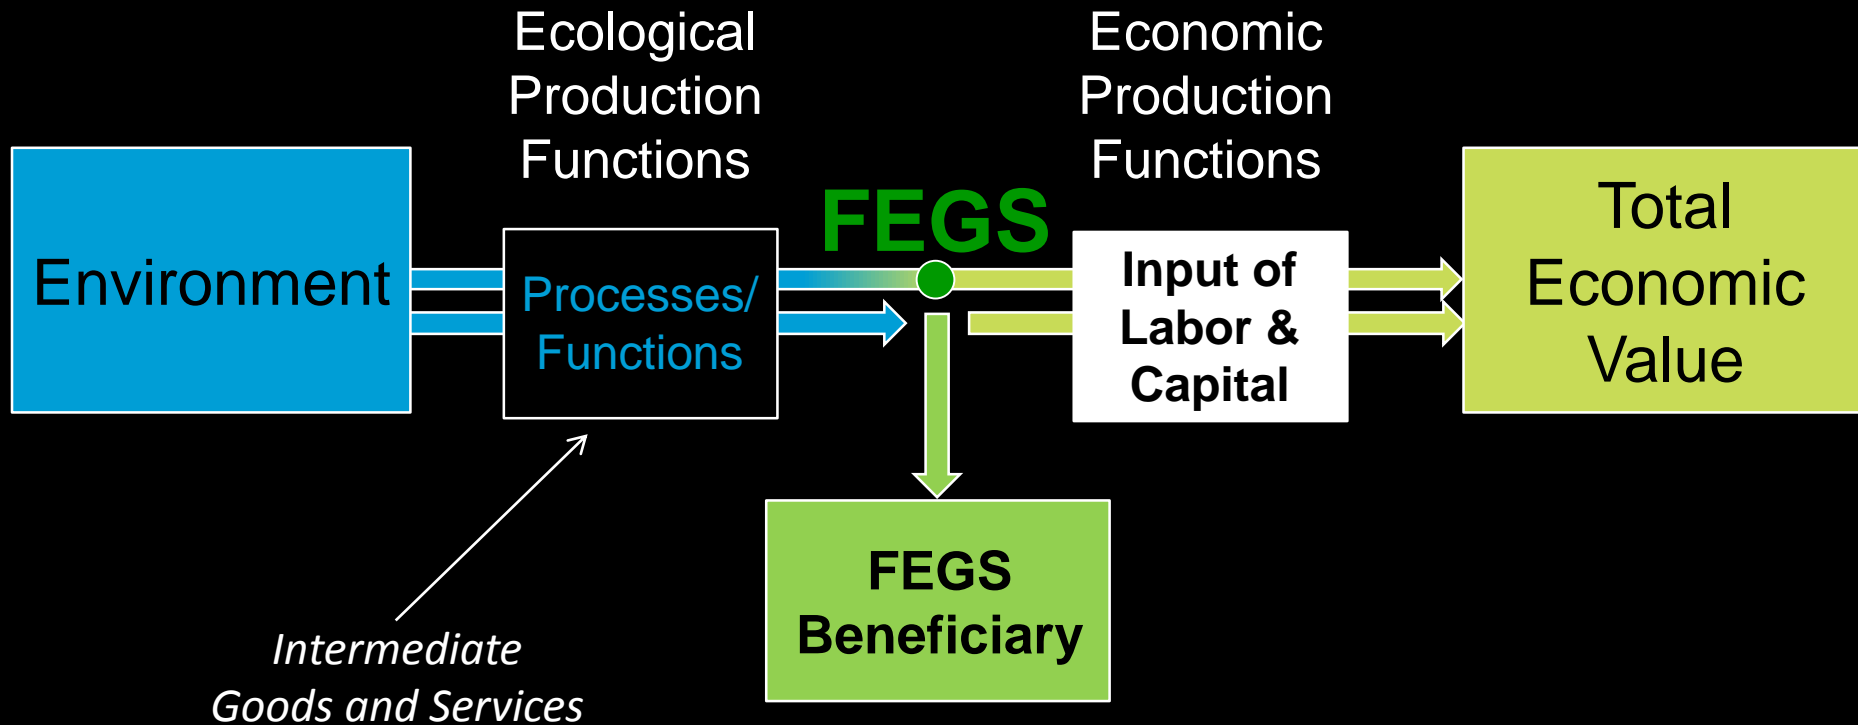

- **Five Key Steps:**

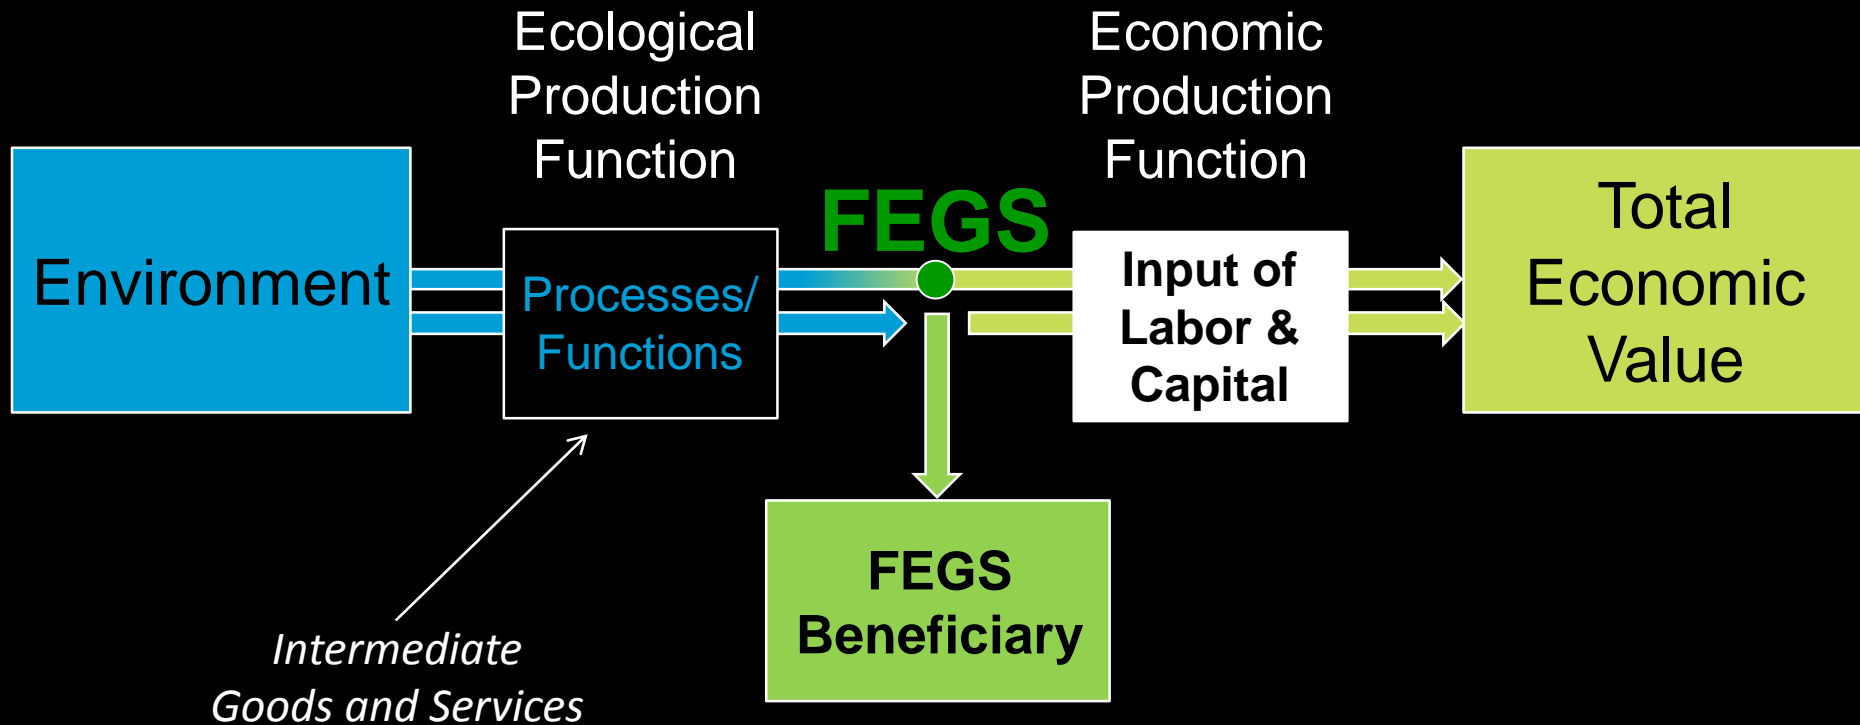

1. Clearly define the Environmental boundaries
2. Identify Categories of Beneficiaries (users)
3. For any Beneficiary and Environmental Class, hypothesize POTENTIAL FEGS
4. Identify and Avoid “intermediate services” (generally processes and functions)
5. Establish and “mind” Boundary Issues (corn and carrots...lithosphere, hydrosphere)

Example 1: Recreational Fishing

Our Classification Scheme

FEGS Classification Structure	
X	Environmental Class
XX.	Environmental Sub-Class
XX.XX	Beneficiary Category
XX.XXXX	Beneficiary Sub-Category

Environmental Classes

“components of nature, directly enjoyed, consumed, or used to yield human well-being” *(Boyd & Banzhaf 2007)*

Environmental Class

- 15 Environmental Sub-Classes
- Facilitate classification of any area in the world
- Boundaries can be identified and mapped using satellite

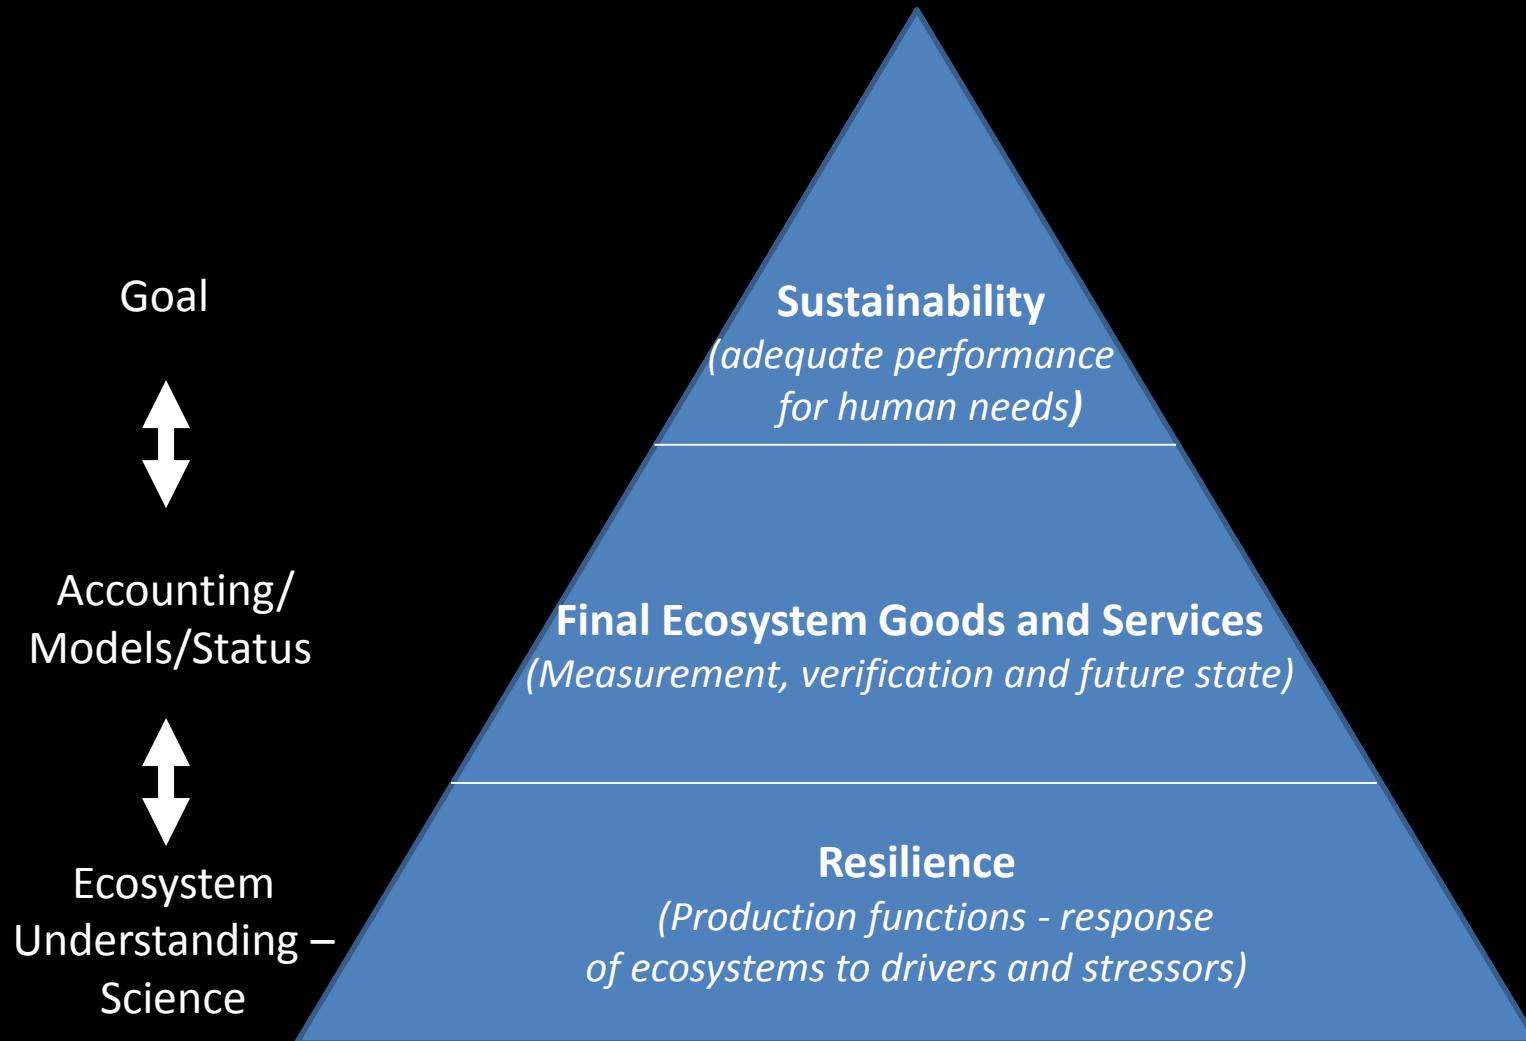

FEGS Environmental SubClasses

FEGS Environmental SubClass Profile

FEGS could well function as the *Environmental Currency* of the ecosystem component of sustainability.

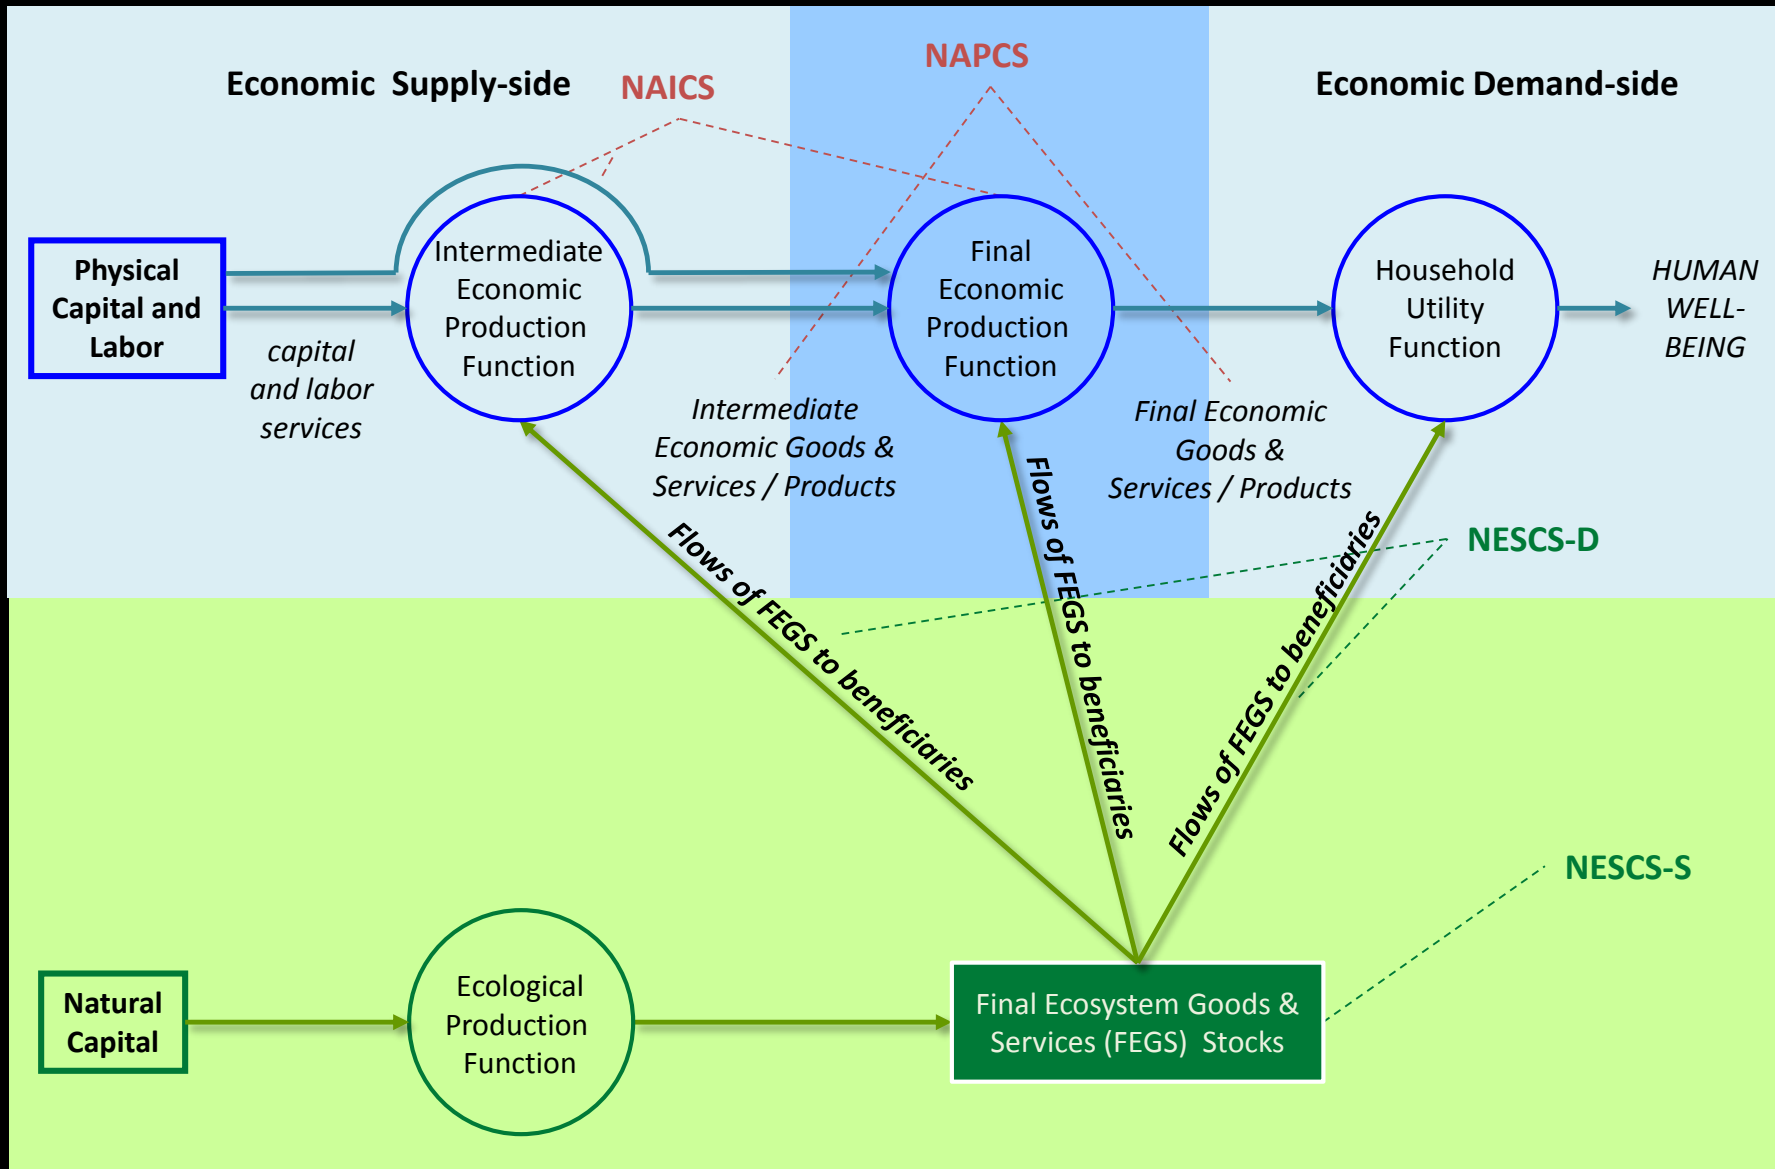

Identifying FEGS

- By using the FEGS approach, an infinite list of ecosystem services was pared down to ~500 FEGS
- FEGS-CS is an operational framework that standardizes identification of ecosystem services at multiple spatial scales
- Published EPA Report
 - Available at <http://gispub4.epa.gov/FEGS>
 - EPA/600/R-13/ORD-004914
- Interactive FEGS-CS website (developing...)
 - *Create and download custom checklists of potential FEGS*
 - *Link with Atlas, mapping and models*
 - *Provide comments to the authors*
 - *Participate in forum discussions*
 - *Web development currently in progress*

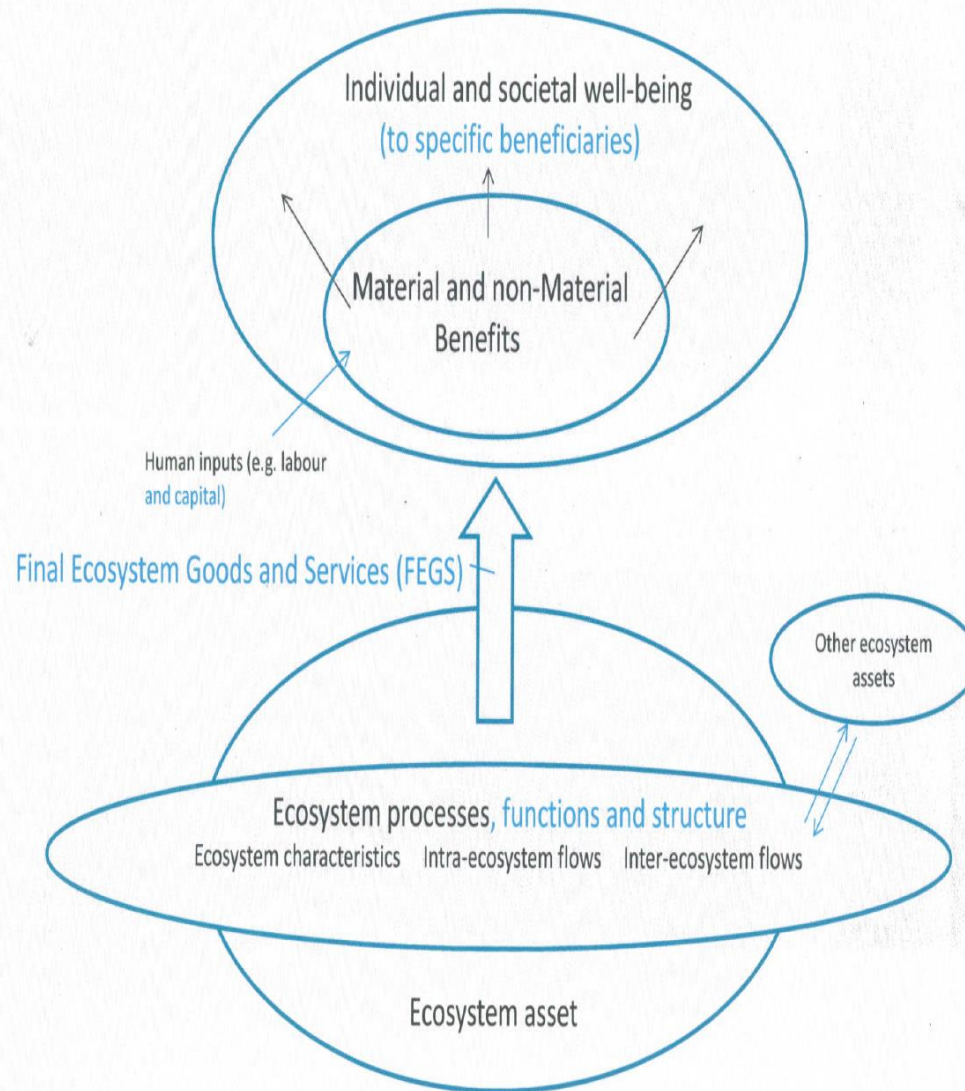

Relationships Among Nature and Economic Systems

END

REVISED Figure 1: General model of flows related to ecosystem services

Modified from: **System of Environmental –Economic Accounting 2012 Experimental Ecosystem Accounting**

Distinguishing FEGS from Non-FEGS

- We used rigid boundaries for FEGS, and made our boundary decisions explicit in FEGS-CS
