

Habitat code: **2170**
 Habitat name: **Dunes with *Salix repens ssp. argentea* (*Salix arenariae*)**

Habitat group: **dunes habitats**
 Regions: **ATL BOR CON MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

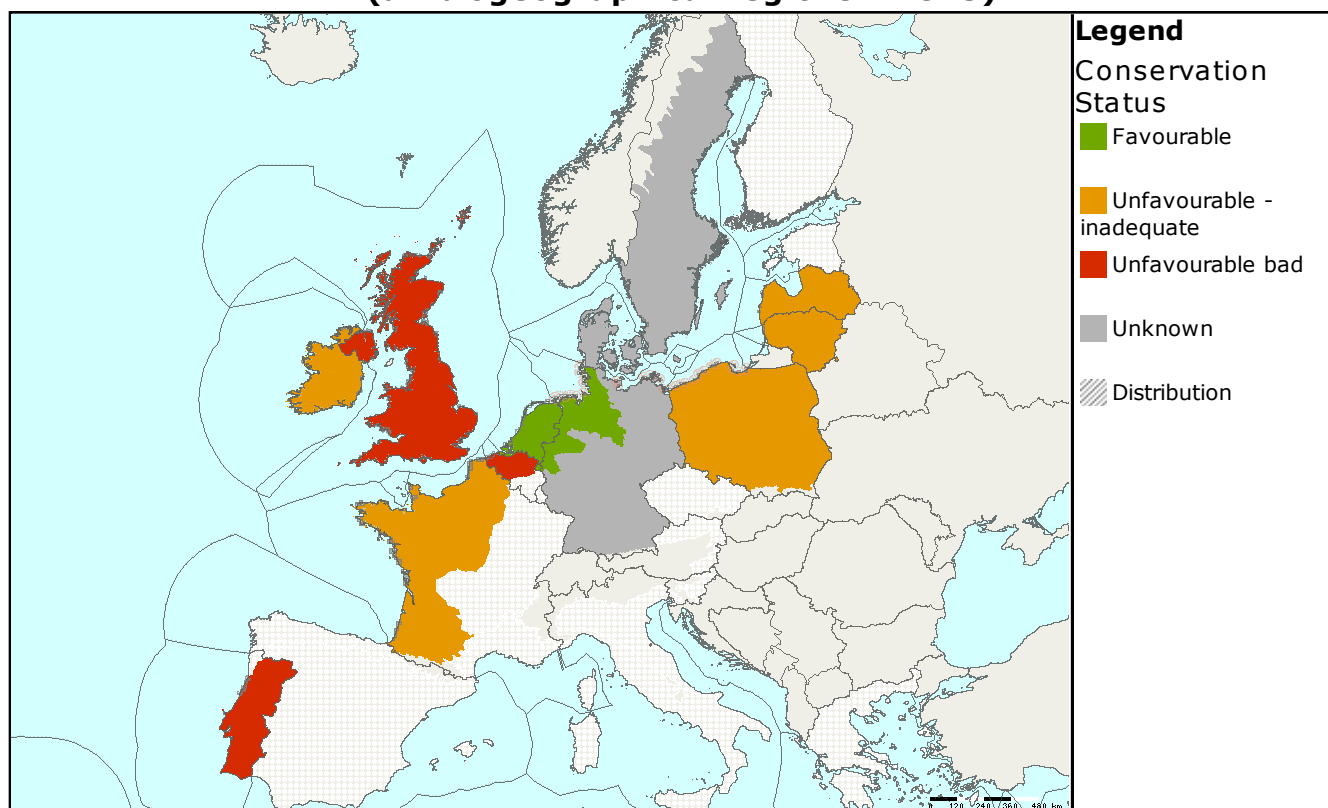

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ATL	Orange	Grey	Grey	Grey	Orange	54	x
EU25	BOR	Green	Orange	Orange	Orange	Orange	1.29	-
EU25	CON	Green	Grey	Grey	Grey	Grey	11	-
EU25	MED	Orange	Orange	Red	Orange	Red	-	-

Wet areas within dune complexes with characteristic vegetation including creeping willow (*Salix repens ssp. argentea*), often found in association with habitat type 2190. This habitat is found along the coast of the Atlantic from Portugal northwards and along the southern coast of the Baltic; although not reported by Spain it is likely that the habitat is present and has possibly been included with habitat type 2190.

'Unfavourable-bad' for the Mediterranean region (only Portugal) due to 'structure & function', 'unfavourable-inadequate' for the Atlantic and Boreal regions particularly due to 'structure and function' and 'future prospects'. Within the Atlantic there is much variation in the conservation status, ranging from 'unfavourable-bad' in Belgium and the United Kingdom to 'favourable' in Atlantic Germany and the Netherlands. 'Unknown' in the Continental region as assessed as 'unknown' by three of the four countries where it is present.

Better information is required

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
BE	ATL						0.75	=	1
DE	ATL						1.6	+	2
DK	ATL						15	X	3
FR	ATL						22	X	2
IE	ATL						1.18	=	1
NL	ATL						7	=	3
UK	ATL						6.42	-	2
LT	BOR						0.3	-	3
LV	BOR						0.69	=	1
SE	BOR						0.3	=	3
DE	CON						0.09	=	3
DK	CON						10	X	3
PL	CON						1.2	-	2
SE	CON						0.2	=	3
PT	MED						N/A	-	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
