

Habitat code: **2230**  
 Habitat name: **Malcolmietalia dune grasslands**

Habitat group: **dunes habitats**  
 Regions: **ATL CON MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

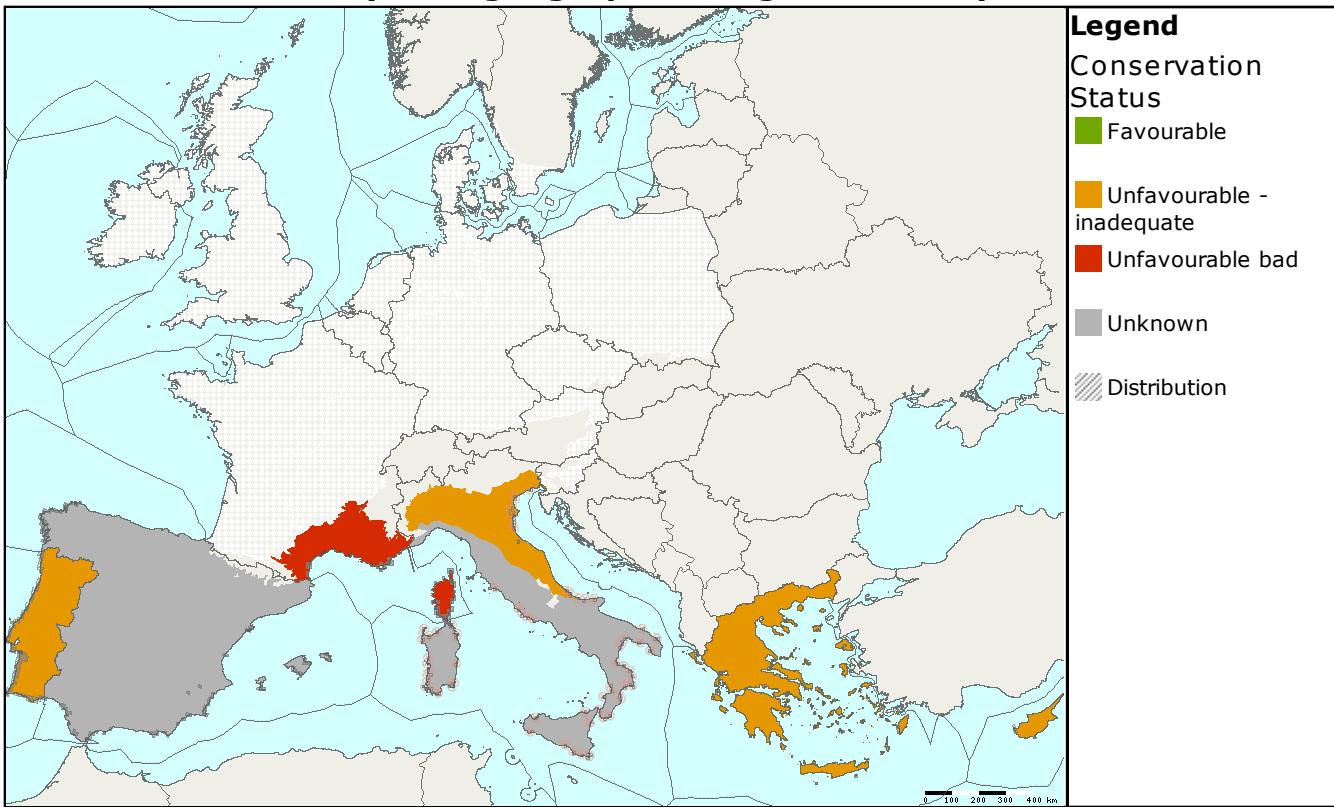

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ATL							
EU25	CON						3	=
EU25	MED						>80	

Vegetation dominated by small annual plants on dry, deep sand around the Mediterranean basin and also Atlantic coasts of Portugal and southern Spain and Macaronesia.

Assessed as 'unknown' for the Atlantic region as Spain, which hosts some three quarters of the habitat area, reported the habitat as 'unknown'. Assessed as 'unfavourable-inadequate' for both the Mediterranean and Continental regions although many countries have reported one or more parameters as 'unknown'.

Better information required, particularly from Italy and Spain.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
ES	ATL						N/A	=	
PT	ATL						N/A	-	
IT	CON						3	=	2
CY	MED						0.1	X	2
EL	MED						0.1	X	1
ES	MED						12.57	-	2
FR	MED						8	-	2
IT	MED						59	=	2
PT	MED						N/A	-	
UK	MED						0.25	+	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
