

Habitat code: **9590**  
 Habitat name: **Cedrus brevifolia forests (Cedrosetum brevifoliae)**

Habitat group: **forests**  
 Regions: **MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

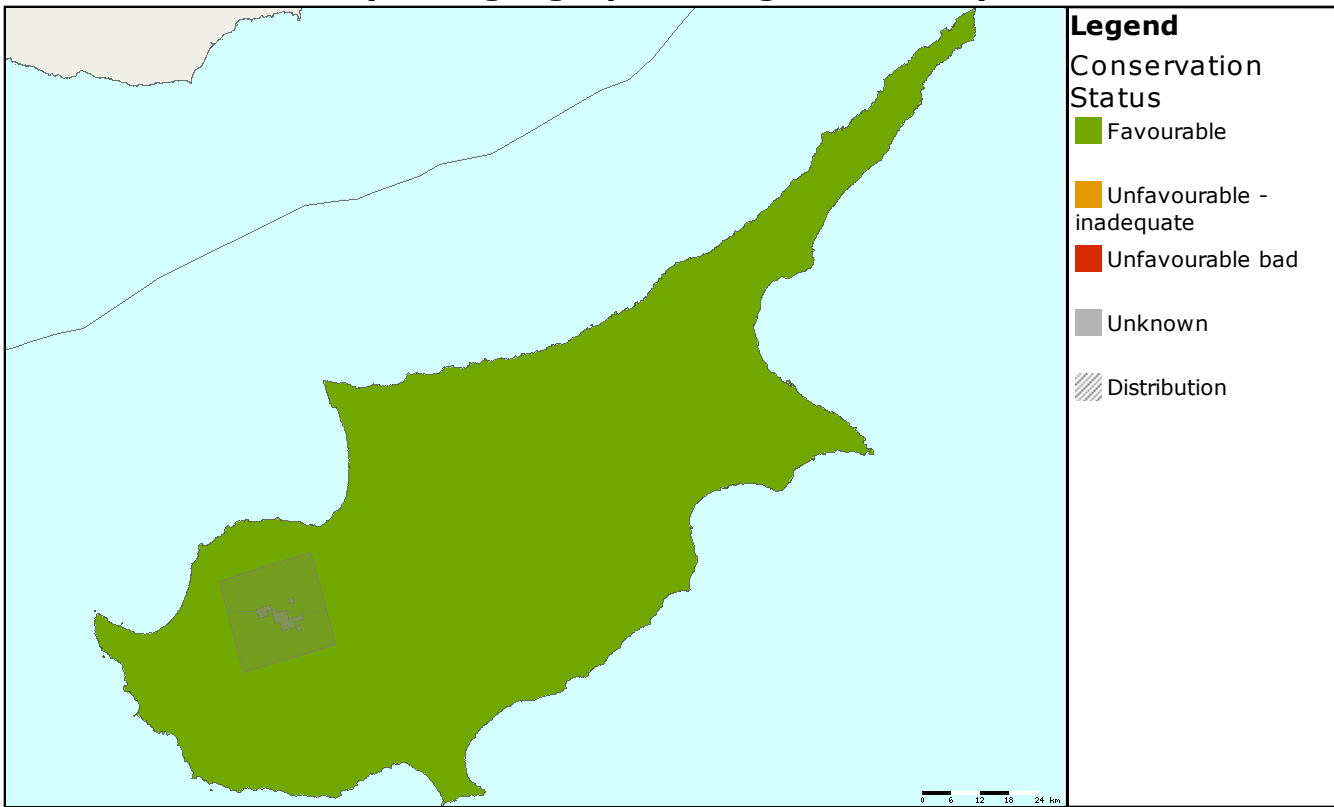

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	MED						4	=

Forests of Cyprus cedar (*Cedrus brevifolia*), endemic to the western summits of the Troodos range of Cyprus.

The conservation status is 'favourable' with no major threats reported. However, the dominant species is sensitive to any change of climate, so climate change may be a potential threat to this habitat.

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Biogeographic Region	Conservation status assessment					Km <sup>2</sup>	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
CY	MED						4	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
