

Habitat code: **91K0**
 Habitat name: **Illyrian *Fagus sylvatica* forests (Aremonio-Fagion)**

Habitat group: **forests**
 Regions: **ALP CON PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

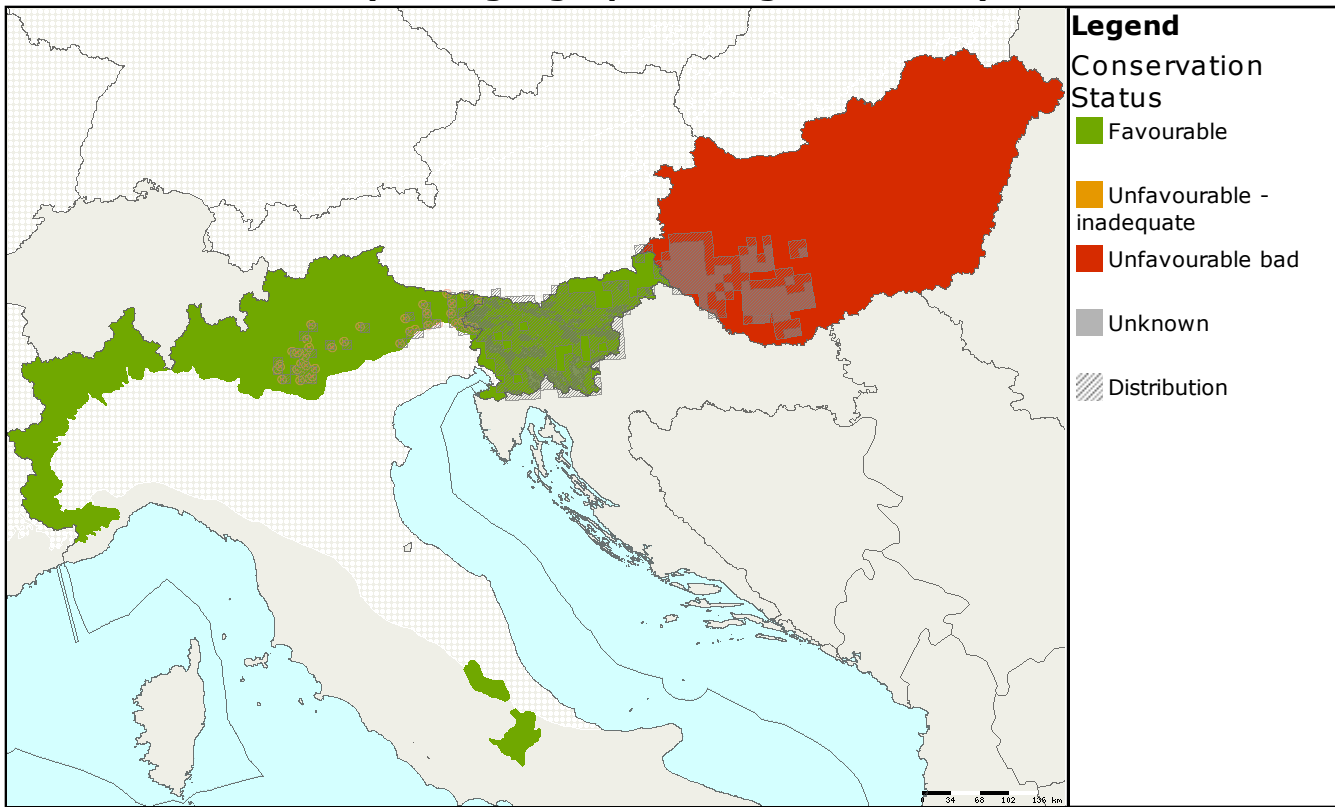

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ALP						1996	+
EU25	CON						897	+
EU25	PAN						280	=

Beech (*Fagus sylvatica*) forests of the Dinaric Alps and associated hills, also locally in the southeastern Alps, the south-western Carpathians and the mid-Pannonian hills. The habitat is often found in association with the other central European types of beech forests, such as 9130, 9140 or 9150. This type of beechwood is notable for its high diversity of vascular plants.

The conservation status in the Pannonian region, where the habitat occurs only in Hungary, is 'unfavourable bad' but in other regions it is 'favourable'.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
IT	ALP						219	=	2
SI	ALP						1777	+	2
SI	CON						897	+	2
HU	PAN						280	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
