

Habitat code: **91R0**
 Habitat name: **Dinaric dolomite Scots pine forests (Genisto januensis-Pinetum)**

Habitat group: **forests**
 Regions: **ALP CON**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ALP						14	=
EU25	CON						11	=

Pine (*Pinus sylvestris*) forests growing on dolomites and dolomite rendzinas in the Dinaric Alps. They are found within the region typical of Illyrian beech forests (habitat type 91K0) and often occupy somewhat higher elevations than the similar dolomite black pine (*P. nigra*) forests that are included in habitat type 9530.

The conservation status in both the Alpine and Continental regions is favourable and no major threats were reported. These forests are of little economic interest.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area	Data quality
		Range	Area	Structure & function	Future prospects	Overall			
SI	ALP						14	=	2
SI	CON						11	=	2

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
