

Habitat code: **6110**
 Habitat name: **Rupicolous calcareous or basophilic grasslands of the Alysso-Sedion albi**

Habitat group: **grasslands**
 Regions: **ALP ATL BOR CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

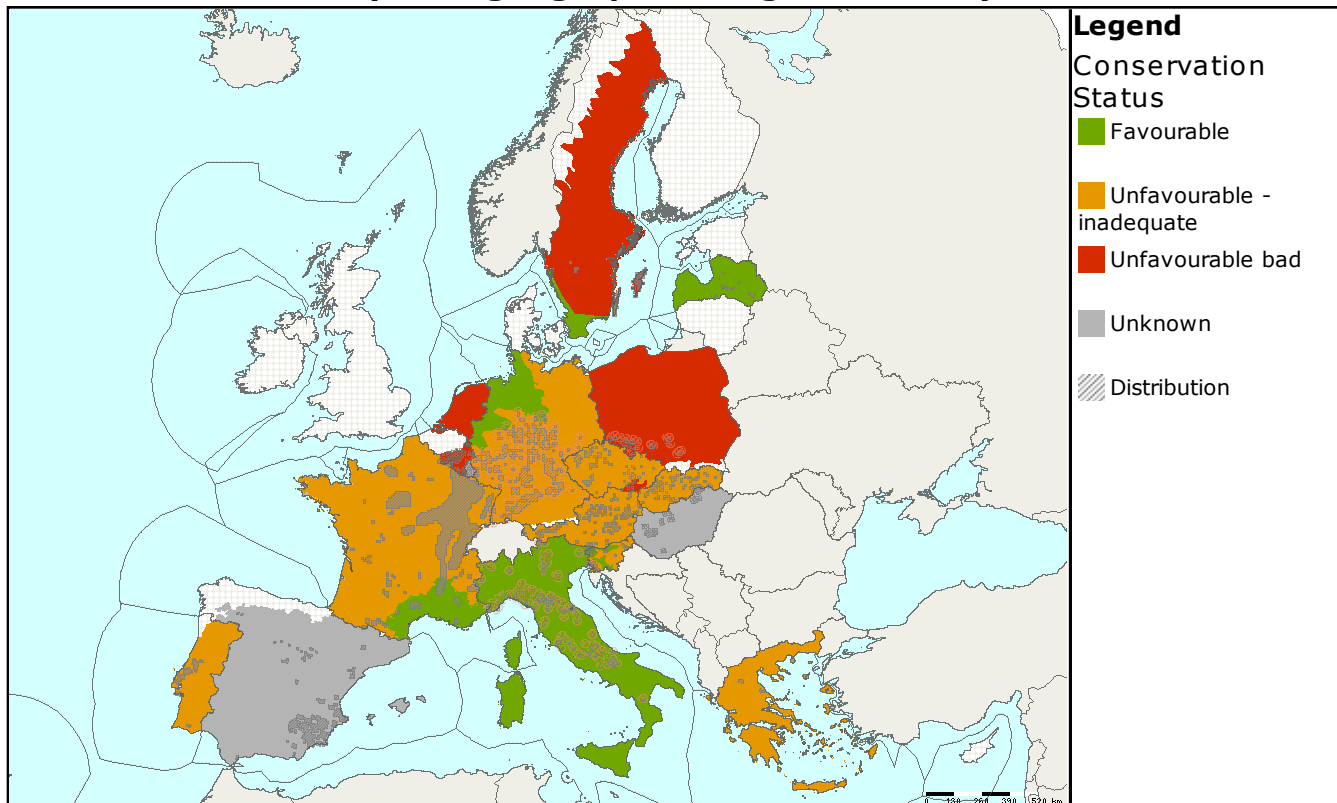

MS	Biogeographic Region	Conservation status assessment					Km ²	Trend in area
		Range	Area	Structure & function	Future prospects	Overall		
EU25	ALP							
EU25	ATL						18	-
EU25	BOR						1.64	-
EU25	CON						>79	
EU25	MED						>1219	
EU25	PAN						0.63	

Open grasslands with many annual and succulent plants such as stonecrops (*Sedum* spp) growing on skeletal base rich or calcareous soils. Most widespread in central Europe but also occurs in the Boreal and Mediterranean regions. Usually this habitat occurs in small patches and estimates of area are difficult.

Assessed as 'unfavourable-inadequate' in the Atlantic and Continental regions due to 'area' and 'future prospects' in France and Germany. However 'unfavourable-bad' in some countries where the habitat is rare such as the Netherlands (Atlantic) and Belgium (Continental) Many countries note abandonment of traditional agricultural as a pressure. Assessed as 'unfavourable-bad' for the Boreal region due to the area in Sweden being much less than the favourable reference value.

'Unknown' in the Mediterranean and Pannonian regions as Spain reported all parameters as 'unknown' and Hungary two. In both regions other countries also noted one or more parameters as 'unknown'. No assessment was possible for the Alpine region as a result of missing data from Spain. If Spain is excluded, the assessment would be 'unfavourable-inadequate'. Better information is required.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
