## **Habitats Directive Article 17 Reporting**

Habitat code: **8130**Habitat group: **rocky habitats**Habitat name: **Western**Regions: **ALP ATL CON MED** 

Mediterranean and thermophilous

screes

Assessments of conservation status at the European level (all biogeographical regions - EU25)

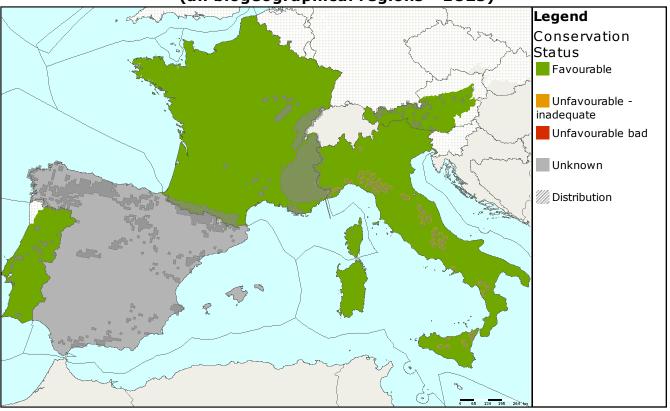

MS	Biogeographic Region	Conservation status assessment						Trend
		Range	Area	Structure & function	Future prospects	Overall	Km <sup>2</sup>	in area
EU25	ALP						>450	
EU25	ATL						>14	
EU25	CON						55	=
EU25	MED						>170	

Calcareous screes in western Europe either in the Mediterranean region or on warm, usually south facing slopes, in the Alps and other mountains such as the Massif Central (France).

Assessed as 'favourable' in the Alpine and Continental regions but as 'unknown' for the Atlantic and Mediterranean regions as Spain reported all parameters as 'unknown'. Excluding Spain from the assessment would give 'favourable' for all four regions. Better information required, particularly from Spain.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Biogeographic Region	С	onser	vation status		Trend	Data		
		Range	Area	Structure & function	Future prospects	Overall	Km <sup>2</sup>	in area	quality
AT	ALP						N/A	=	3
ES	ALP						231.04	X	3
FR	ALP						192	=	2
IT	ALP						27	=	2
ES	ATL						N/A	N/A	
FR	ATL						14	=	2
FR	CON						19	=	2
IT	CON						36	=	2
ES	MED						N/A	X	
FR	MED						118	=	2
IT	MED						52	=	2
РТ	MED						N/A	=	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006.
