

Species name: **Coronella austriaca**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **ALP ATL BOR CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

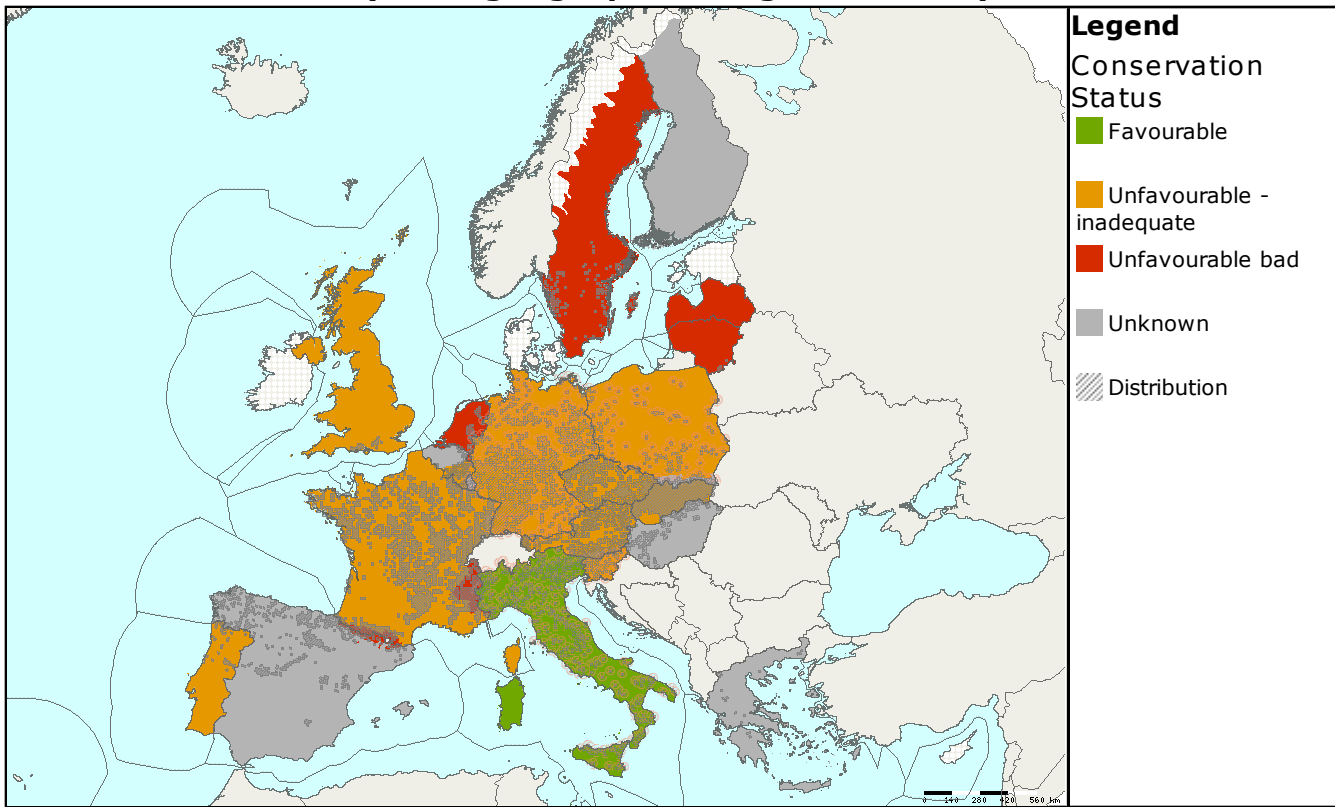

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Orange	Grey	Orange	Grey	Orange	1472 grids	
EU25	BOR	Green	Red	Orange	Orange	Red	190 grids	
EU25	CON	Orange	Orange	Orange	Orange	Orange	3492 grids	
EU25	MED	Grey	Grey	Grey	Grey	Grey	811 grids	
EU25	PAN	Green	Grey	Grey	Grey	Grey	424 grids	
EU25	ATL	Orange	Orange	Orange	Orange	Orange	1304 grids	

The smooth snake is present in six biogeographical regions all across the Europe. Overall assessment is more or less the same in all biogeographic regions; the conservation status is 'unfavourable-inadequate' combined with 'unknown' with most data lacking for Mediterranean region. Information is scarce for several parameters all around and further studies are needed to clarify the ecology of the species. The worst assessment, 'unfavourable-bad', is for Boreal region but that is caused by the fact that it is the edge of the natural range for this species.

The species has not been assessed by IUCN.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	ALP	Green	Orange	Orange	Orange	Orange	5000 - 30000 indiv.	-	3
