Species group: **Amphibians & Reptiles**
Regions: **MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

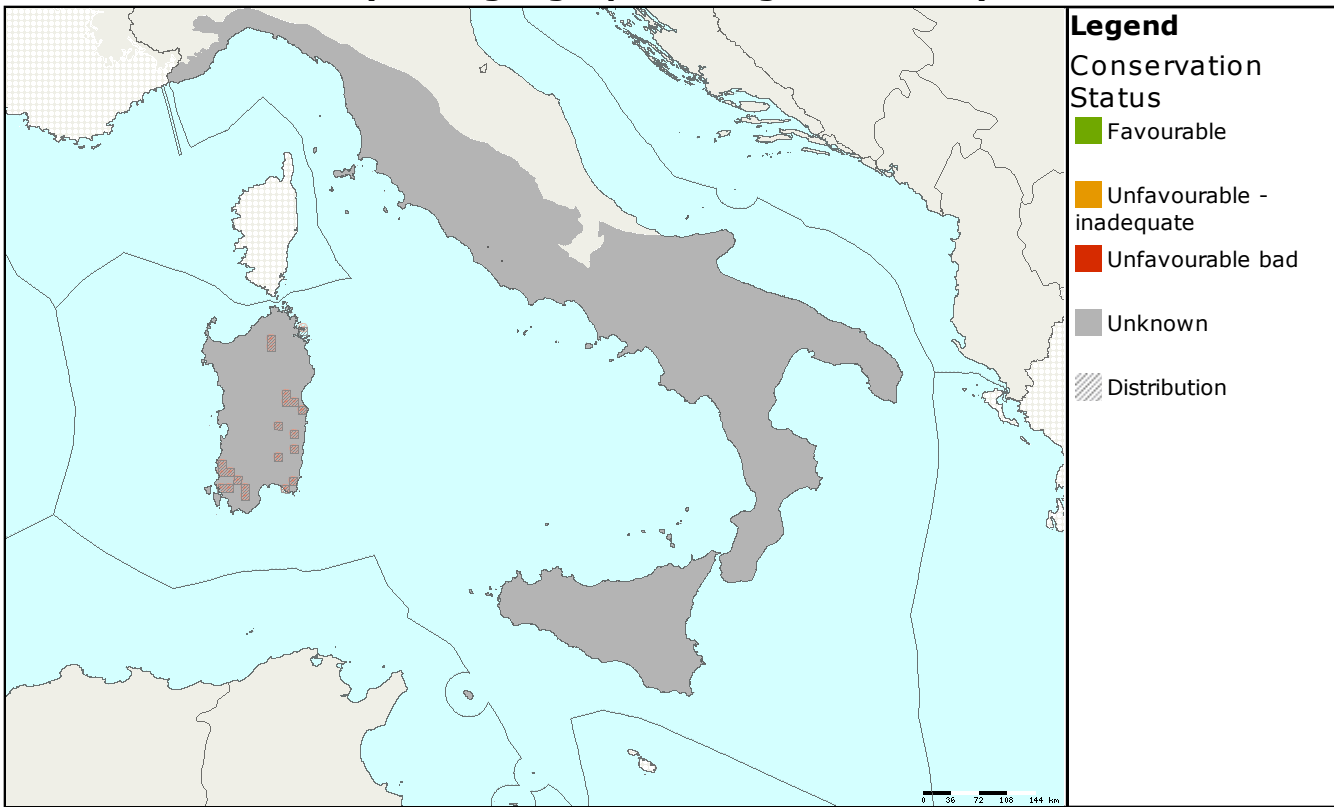

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED							X

A subspecies of the Grass Snake endemic to Sardinia, where it is very rare. It is associated with an aquatic environment, and it preferably occurs in mountainous areas.

The conservation status of this snake is 'unknown'. The information on status of population, on status of range and on the potential threats is not available or is scarce. The subspecies is considered 'endangered' in Italy.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	MED						21 - 22 grids	X	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
