

Species name: **Podarcis muralis**
Annex: **IV**

Species group: **Amphibians & Reptiles**
Regions: **ALP ATL CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

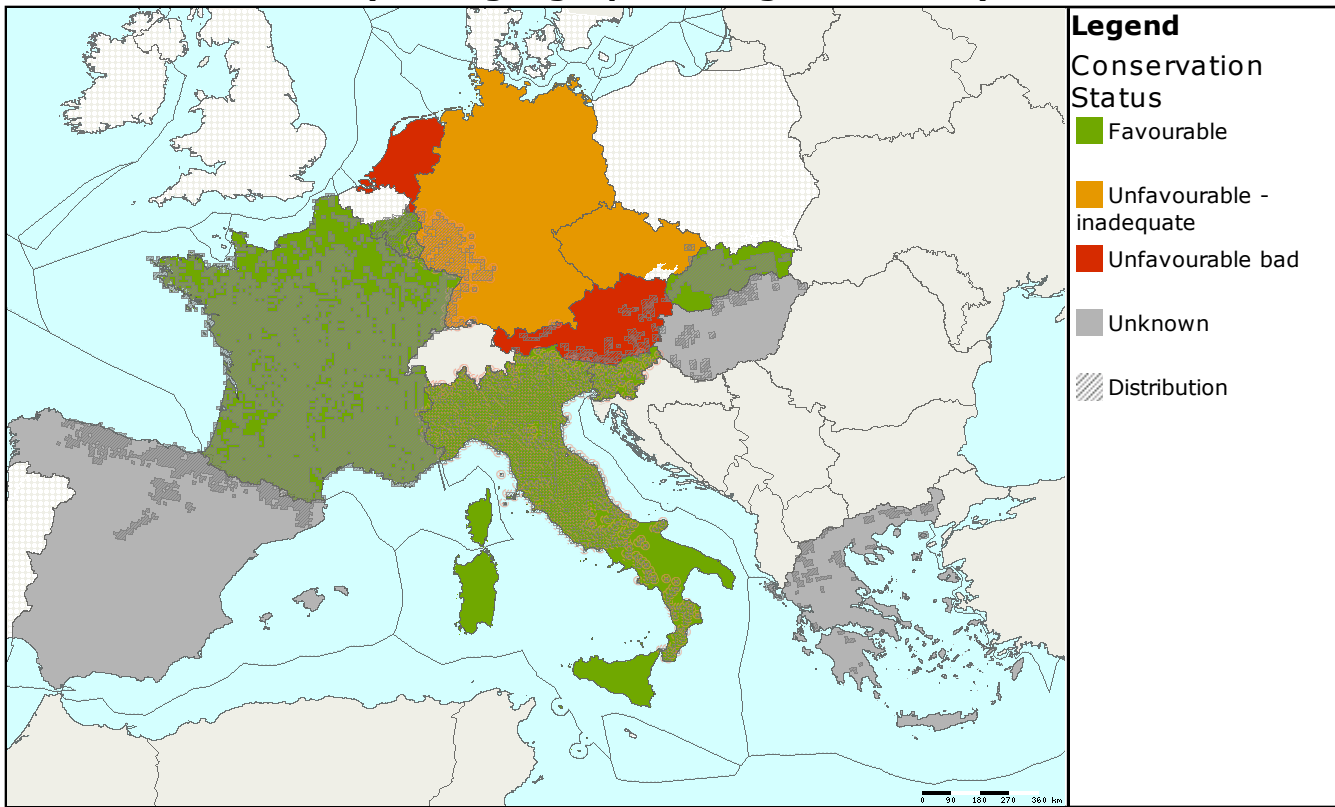

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						1446 grids	
EU25	CON						3088 grids	
EU25	MED						1750 grids	
EU25	PAN						274 grids	
EU25	ATL						2467 grids	

The wall lizard is a widely distributed species. It inhabits nearly all European countries but is absent in the Nordic countries and the southern parts of Europe. In general it has a preference for dry, rocky areas but is also found in scrublands, woodlands, agricultural areas and buildings.

In nearly all biogeographical regions (Alpine, Atlantic, Continental and Mediterranean) the status of this species was assessed as 'favourable'. Due to a lack of data from Hungary the status in the Pannonian region remains 'unknown'. Furthermore data from Spain and Greece are lacking. In general this species is performing well and only Austria and the Netherlands have reported a 'bad' status. Due to its wide distribution and habitat tolerance the IUCN conservation status is 'Least Concern'.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	ALP	Green	Red	Orange	Red	Red	1000 - 4000 indiv.	-	3
