

Species name: **Salamandrina terdigitata**
Annex: **II, IV**

Species group: **Amphibians & Reptiles**
Regions: **ALP CON MED**

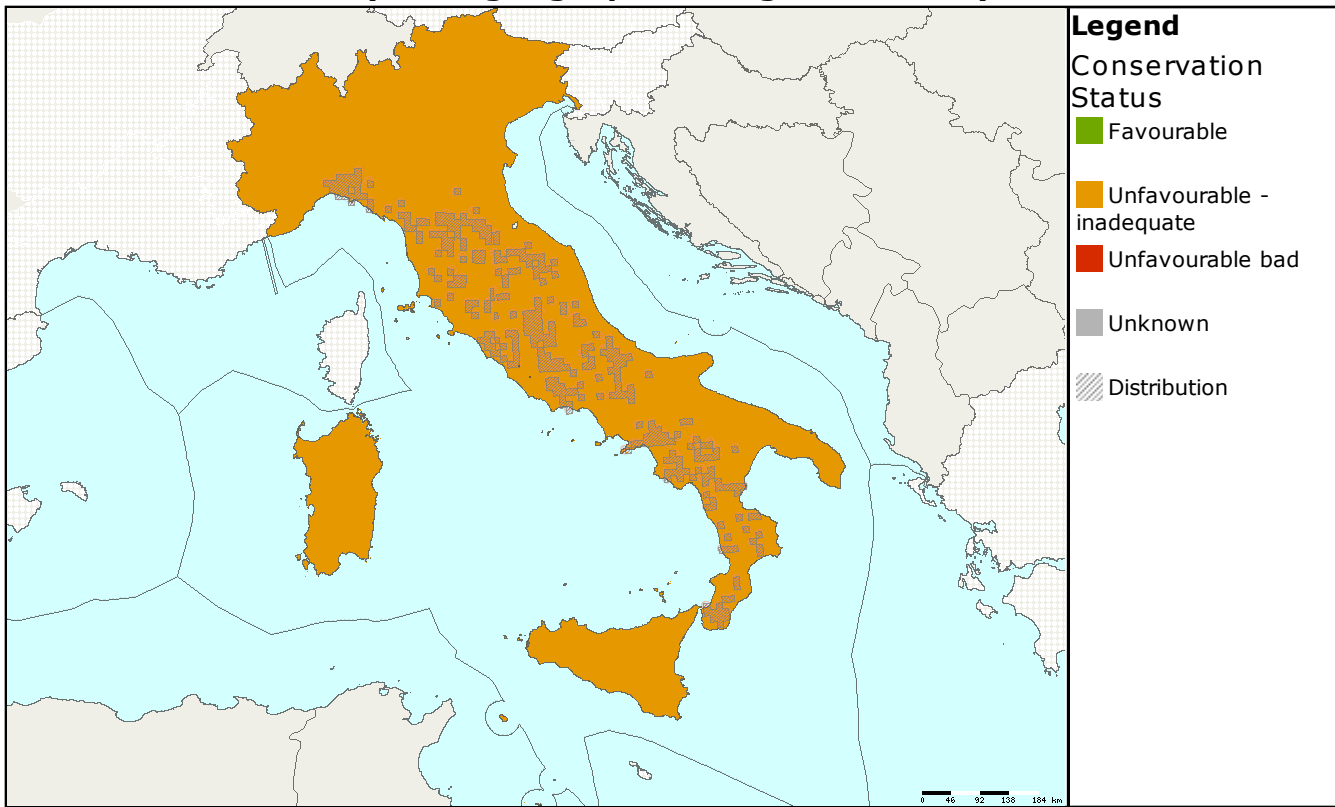

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Orange	Orange	Orange	Grey	Orange		X
EU25	CON	Orange	Orange	Orange	Orange	Orange		=
EU25	MED	Green	Orange	Orange	Orange	Orange		=

The spectacled salamander is endemic to southern peninsular Italy in the Apennine Mountains (where it is widespread) and other hilly areas, south of Caserta province (Campania region). It is mainly found in forests with dense undergrowth in hilly and mountainous areas. The overall assessment for the species in the three biogeographical regions where it appears is "unfavourable-inadequate". The species is only reported by Italy. The species is listed as "Least Concern" by IUCN in view of its relatively wide distribution.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	ALP	Orange	Orange	Orange	Grey	Orange	9 - 9 grids	X	3
IT	CON	Orange	Orange	Orange	Orange	Orange	68 - 80 grids	=	2
IT	MED	Green	Orange	Orange	Orange	Orange	250 - 271 grids	=	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
