

Species name: **Helix pomatia**
Annex: **V**

Species group: **Invertebrates**
Regions: **ALP ATL BOR CON MED PAN**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

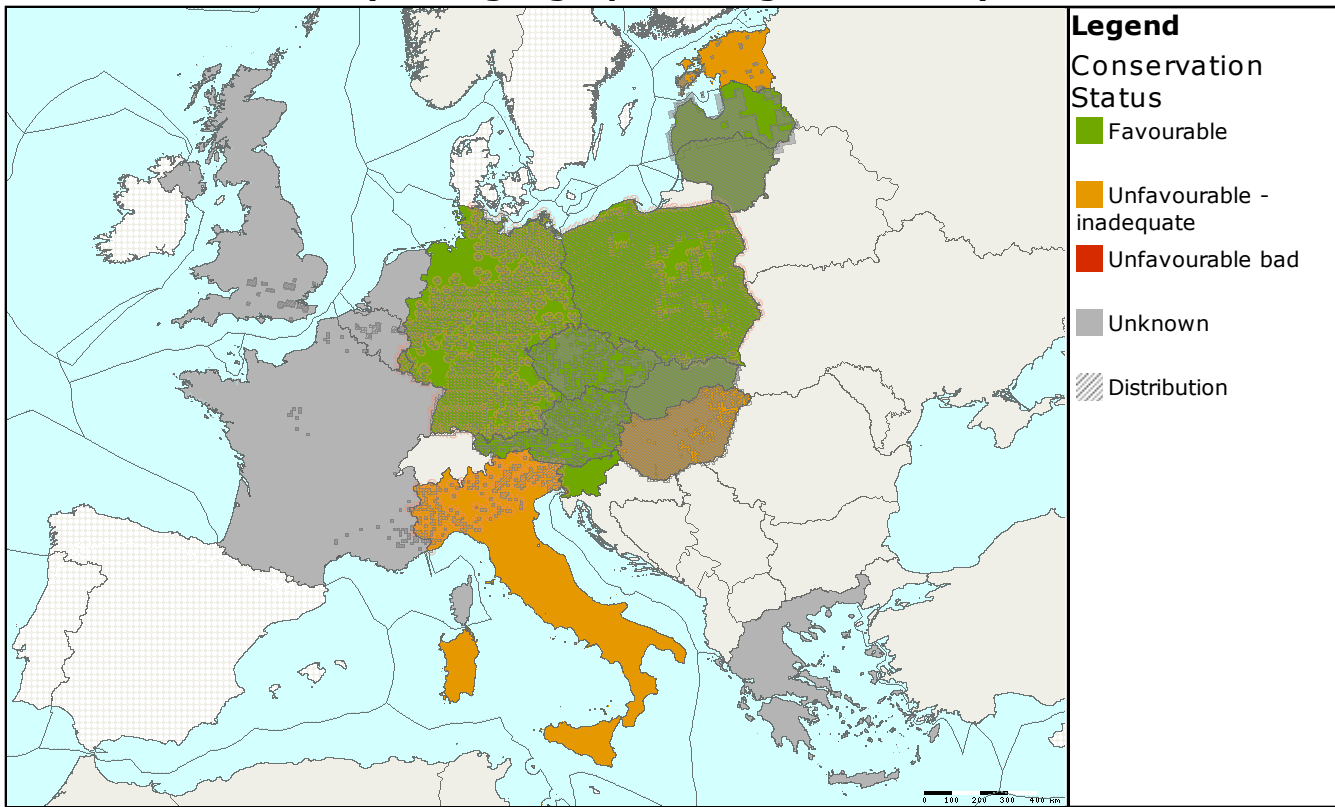

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP						> 1202 grids	
EU25	BOR						230 - 300 loc.	+
EU25	CON						> 5411 grids	
EU25	MED						> 46 grids	
EU25	PAN						1287 grids	
EU25	ATL						405 grids	

The edible snail is distributed mainly across central and south-eastern Europe. It occurs in six biogeographical regions.

Species was assessed as 'favourable' in Atlantic, Boreal and Continental regions with some 'unknown' and 'unfavourable-inadequate' country reports not affecting the overall assessments. In Alpine region species status is 'favourable' in five countries. However, overall assessment is 'unfavourable-inadequate' due to report from Italy, where more than 25% of species range is located. Similar situation is found in the Pannonian region where the report from Hungary which hosts 84% of range results in the overall assessment 'unfavourable-inadequate'. For Mediterranean region overall conclusion is 'unknown' due to assessments in Greece and France, where more than 54.4% of its distribution area is located. Species was not evaluated by IUCN.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size & unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
AT	ALP						44 - 44 grids	-	3
DE	ALP						30 - (30) x	X	3
FR	ALP						18 - 18 loc.	X	1
IT	ALP						280 - 508 loc.	-	2
PL	ALP						15000000 - 20000000 indiv.	=	1
SI	ALP						N/A x	=	3
SK	ALP						100 - 200 loc.	+	2
