

Species name: **Stenobothrus eurasius**
Annex: **II, IV**

Species group: **Invertebrates**
Regions: **ALP CON MED PAN**

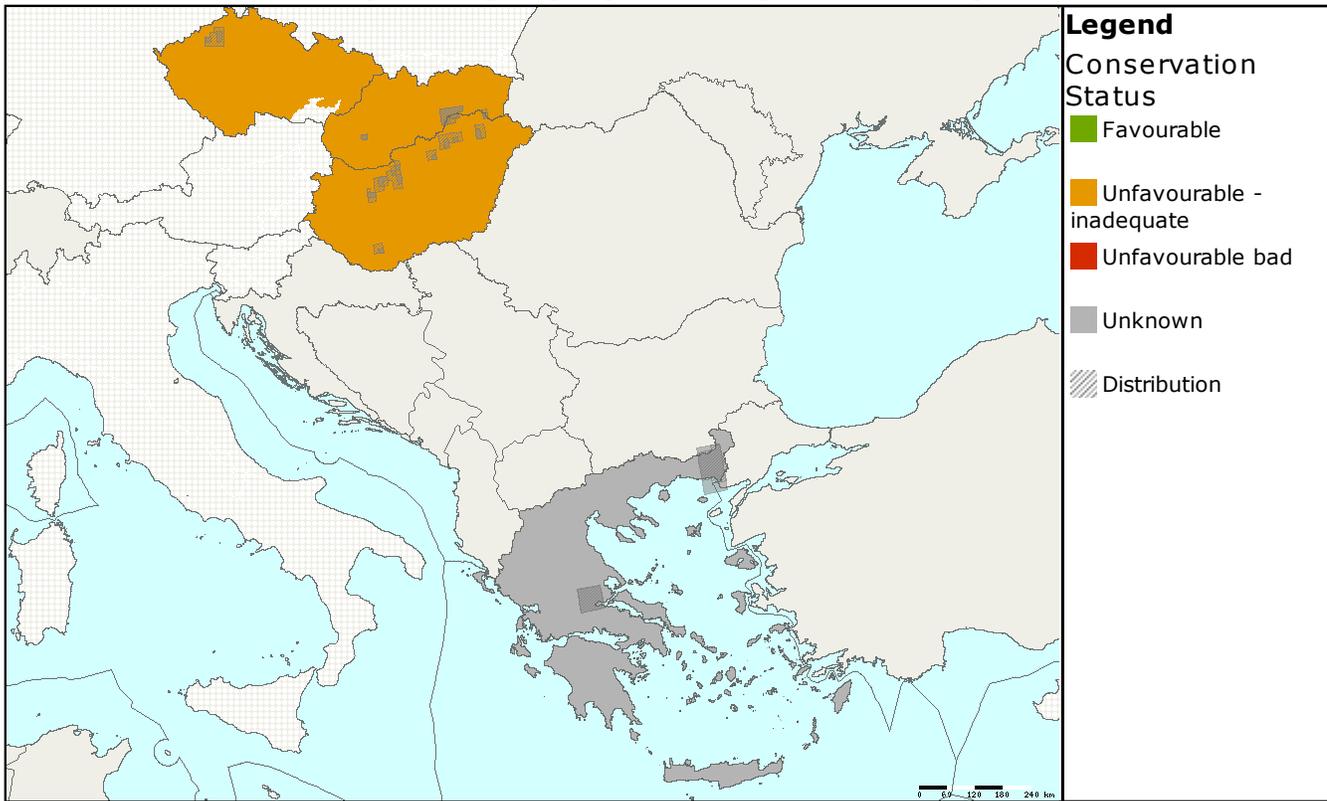

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Orange	Orange	Orange	Grey	Orange	10 - 25 loc.	-
EU25	CON	Green	Orange	Grey	Orange	Orange	7 loc.	=
EU25	MED	Grey	Grey	Grey	Grey	Grey		X
EU25	PAN	Orange	Orange	Orange	Orange	Orange	70 grids	-

ALP: *Stenobothrus eurasius* was recorded in a few locations in the southern parts of the Alpine region in Slovakia, in the contact zone with the Pannonian region. Since the assessments of almost all the parameters are "inadequate", the overall assessment is also "inadequate". CON: The species was found at 7 localities in the north-west of Czech. However assessment of the population is unclear (stable population but information about other factors-reproduction, mortality, etc. is unknown), these would not have an impact on the overall assessment ("inadequate") due to the "inadequate" assessment of future prospects. MED: The occurrence of this species in the Mediterranean region is recorded only in a few parts of Greece. Because of poor knowledge and lack of data, assessments of all parameters and the overall assessment are "unknown". PAN: Two countries reported this species in the Pannonian region (Hungary and Slovakia), with the majority of the species occurring in Hungary where it has a wide geographical spread. Since trends for most of the parameters are negative and the future prospects are poor all assessments for both countries are "unfavourable - inadequate".

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
SK	ALP						10 - 25 loc.	-	3
CZ	CON						7 - 7 loc.	=	1
EL	MED						4 - (4) x	X	2
HU	PAN						1500 - 5000 indiv.	-	2
SK	PAN						10 - 25 loc.	-	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
