Habitats Directive Article 17 Reporting

Species name: Lynx pardinus Species group: Mammals

Annex: II*, IV Regions: MED

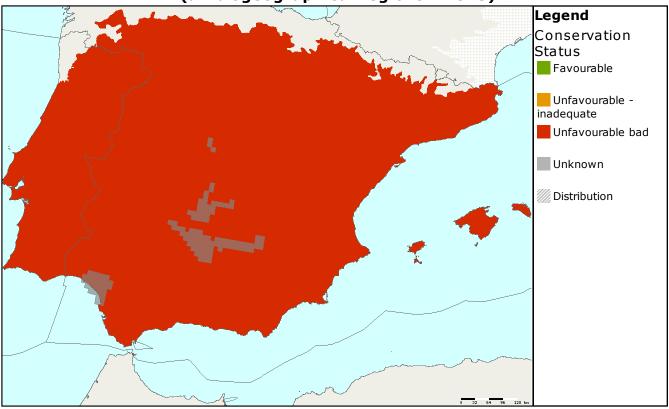

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region		Conservatio	Donulation	Donulation			
		Range	Population	Habitat	Future prospects		Population size & unit	
EU 25	MED						265 indiv.	-

The Iberian Lynx s is restricted to the Iberian Peninsula. It inhabits Mediterranean woodland and maquis thicket. It favours a mosaic of dense scrub for shelter and open pasture for hunting rabbits. Its overall conservation status for Mediterranean region is 'unfavourable-bad'. It suffered from a strong decline in the last 20 years and the remaining populations are very small and fragmented. Future prospects are 'bad'. With a total population of 84-143 adults, the Iberian lynx is qualified as 'critically endangered' species in IUCN Red List.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment						Donulation	Data
		Range	Population	Habitat	Future prospects	Overall	Size&unit	Population trend	quality
ES	MED						(265) - 265 indiv.	-	
PT	MED						N/A indiv.	_	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at http://biodiversity.eionet.europa.eu/article17
