

Species name: **Aconitum firmum ssp. moravicum**  
 Annex: **II, IV**

Species group: **Plants**  
 Regions: **ALP CON**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

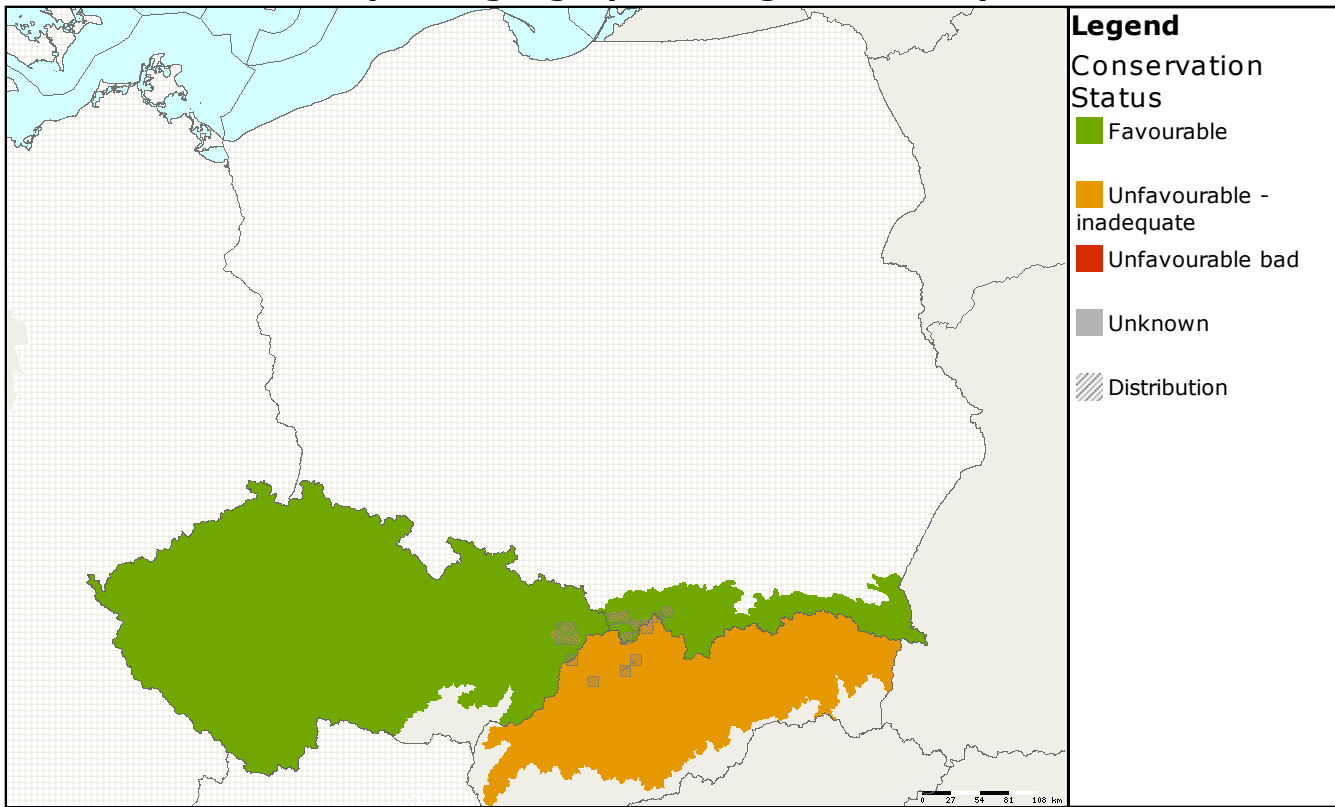

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ALP	Unfavourable - inadequate	Unknown	Favourable	Unknown	Unfavourable - inadequate	4000 - 9000 indiv.	
EU25	CON	Favourable	Favourable	Favourable	Favourable	Favourable	50 loc.	+

The centre of the distribution of this plant endemic to western-Carpathian, is in the mountainous regions in the north-western part of Slovakia. The species occurs as well in the adjacent region of Poland and Czech Republic. It occurs in tall herb fringe communities of mountain and subalpine water streams and springs on both acidic and calcareous substrates.

The conservation status in the Alpine biogeographical region is 'unfavourable inadequate' which is a consequence of the long-term continuous decline in the number of localities in the centre of the distribution in Slovakia. The conservation status in the Continental biogeographical regions, where the species occurs only in the Czech Republic is 'favourable' as neither populations nor habitat of the species are particularly threatened.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
PL	ALP						2000 - (2000) indiv.	X	3
SK	ALP						2000 - 7000 indiv.	=	2
CZ	CON						50 - 50 loc.	+	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
