

Species name: **Bencomia brachystachya**  
 Annex: **II\*, IV**

Species group: **Plants**  
 Regions: **MAC**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						96 indiv.	=

MAC: The overall assessment is "unfavourable - bad" due to small population and range. The future prospect reported inconsistently - verbal expression "poor", conclusion "unfavourable - bad". Bush endemic to Gran Canaria, Spain. Classified as CR in Spanish RDB. See [http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora\\_vascular/pdf/1098.pdf](http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/1098.pdf)

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						96 - (96) indiv.	=	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
