

Species name: **Caralluma burchardii**
Annex: **II, IV**

Species group: **Plants**
Regions: **MAC**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						3576 - 7670 indiv.	+

MAC: Endemic to the eastern islands of the Canary Islands, Spain Assessed as poor but improving but ES assessment not coherent (Ref value for population far below actual, Ref value for Range given as less than actual, future prospects noted as good but assessed as poor) Better report would allow a more accurate assessment

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						3576 - 7670 indiv.	+	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
