

Species name: **Crepis pusilla**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						17 grids	

*Crepis pusilla* is rare and poorly known plant species reported in Mediterranean region by Cyprus, Greece and Malta. It is also known from Mallorca (Spain) and Portugal but not reported. Overall assessment is 'unknown' but reported as 'unfavourable-bad' by Malta and it is clearly not favourable for the region. Better information required in the future.

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
CY	MED						11200 - 11200 indiv.	X	2
EL	MED						N/A x	X	
MT	MED	MT has provided a report to the European Commission under Article 17							

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
