## **Habitats Directive Article 17 Reporting**

Species name: Potentilla delphinensis Species group: Plants

Annex: II, IV Regions: ALP

Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS   | Region |       | Conservatio | Population | Donulation          |         |                        |       |
|------|--------|-------|-------------|------------|---------------------|---------|------------------------|-------|
|      |        | Range | Population  | Habitat    | Future<br>prospects | Overall | Population size & unit | Trend |
| EU25 | ALP    |       |             |            |                     |         |                        | =     |

ALP: Endemic to the French alps, in the past also recorded from adjacent parts of Italy but its presence here has never been confirmed Biology of the plant poorly known All parameters assessed as unfavourable-poor except for range which is favourable See http://www.ecologie.gouv.fr/IMG/natura2000/habitats/pdf/tome6/1534.pdf

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

| MS | Region | (     | Conservation | status  |                     | Donulation | Data      |                     |         |
|----|--------|-------|--------------|---------|---------------------|------------|-----------|---------------------|---------|
|    |        | Range | Population   | Habitat | Future<br>prospects | Overall    | Size&unit | Population<br>trend | quality |
| FR | ALP    |       |              |         |                     |            | 37 - 37 x | =                   | 2       |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006.
