

Species name: **Ferula latipinna**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MAC**

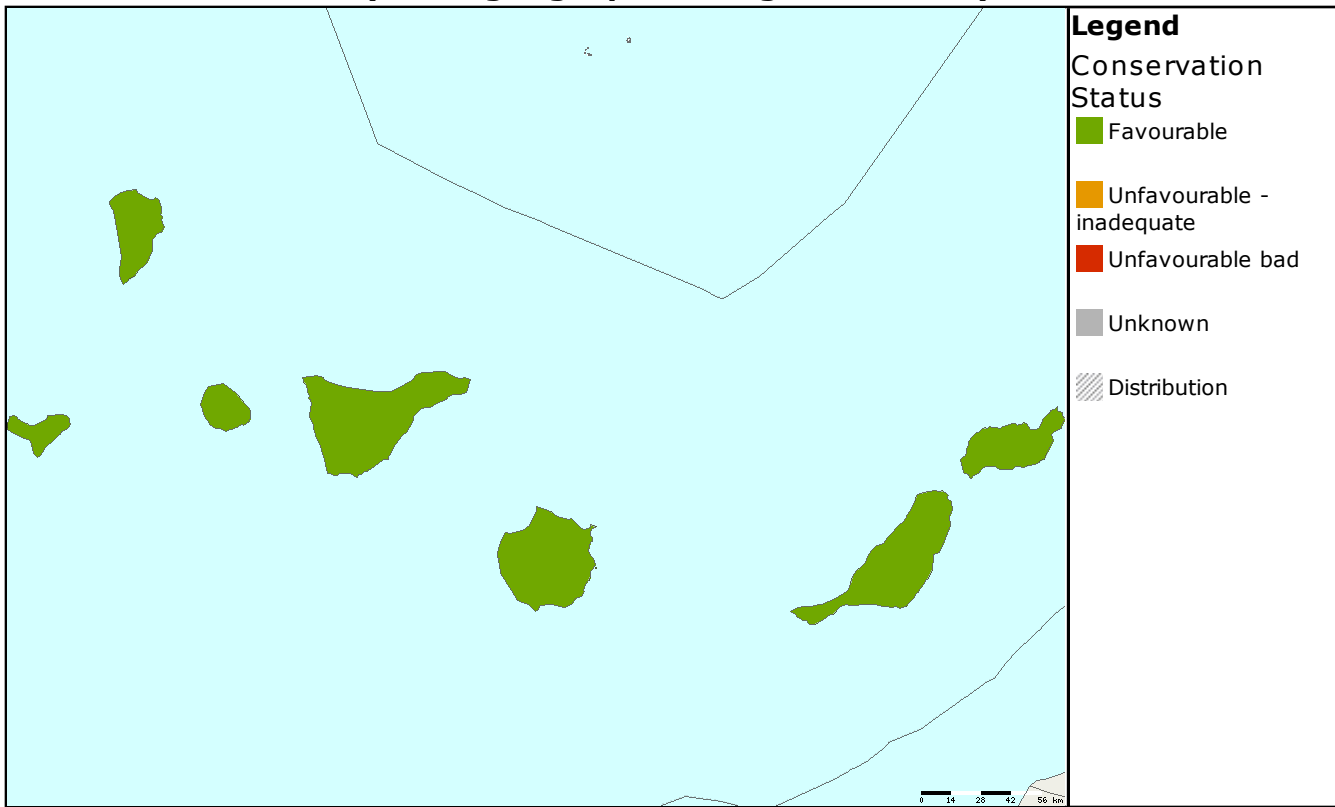

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC	<span style="background-color: green; color: green;"> </span>	<span style="background-color: orange; color: orange;"> </span>	<span style="background-color: green; color: green;"> </span>	<span style="background-color: green; color: green;"> </span>	<span style="background-color: green; color: green;"> </span>	6258 indiv.	+

MAC: Endemic to Canary islands. Some populations in optimal state of conservation and very dense.

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						6258 - (6258) indiv.	+	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
