

Species name: **Iris marsica**  
Annex: **IV**

Species group: **Plants**  
Regions: **ALP CON MED**

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS   | Region | Conservation status assessment |            |         |                  |         | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
|      |        | Range                          | Population | Habitat | Future prospects | Overall |                        |                  |
| EU25 | ALP    |                                |            |         |                  |         | 2 loc.                 | =                |
| EU25 | CON    |                                |            |         |                  |         | 3 loc.                 | =                |
| EU25 | MED    |                                |            |         |                  |         | 7 loc.                 | =                |

The *Iris marsica* is a flowering plant species which only occurs in the Italian Apennines. The status of this species is 'favourable' for all the geographical regions it occurs (Alpine, Continental and Mediterranean; all in Italy).

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment |            |         |                  |         | Size&unit  | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|------------|------------------|--------------|
|    |        | Range                          | Population | Habitat | Future prospects | Overall |            |                  |              |
| IT | ALP    |                                |            |         |                  |         | 2 - 2 loc. | =                | 2            |
| IT | CON    |                                |            |         |                  |         | 3 - 3 loc. | =                | 2            |
| IT | MED    |                                |            |         |                  |         | 7 - 7 loc. | =                | 2            |

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
