

Species name: **Limonium lanceolatum**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **ATL MED**

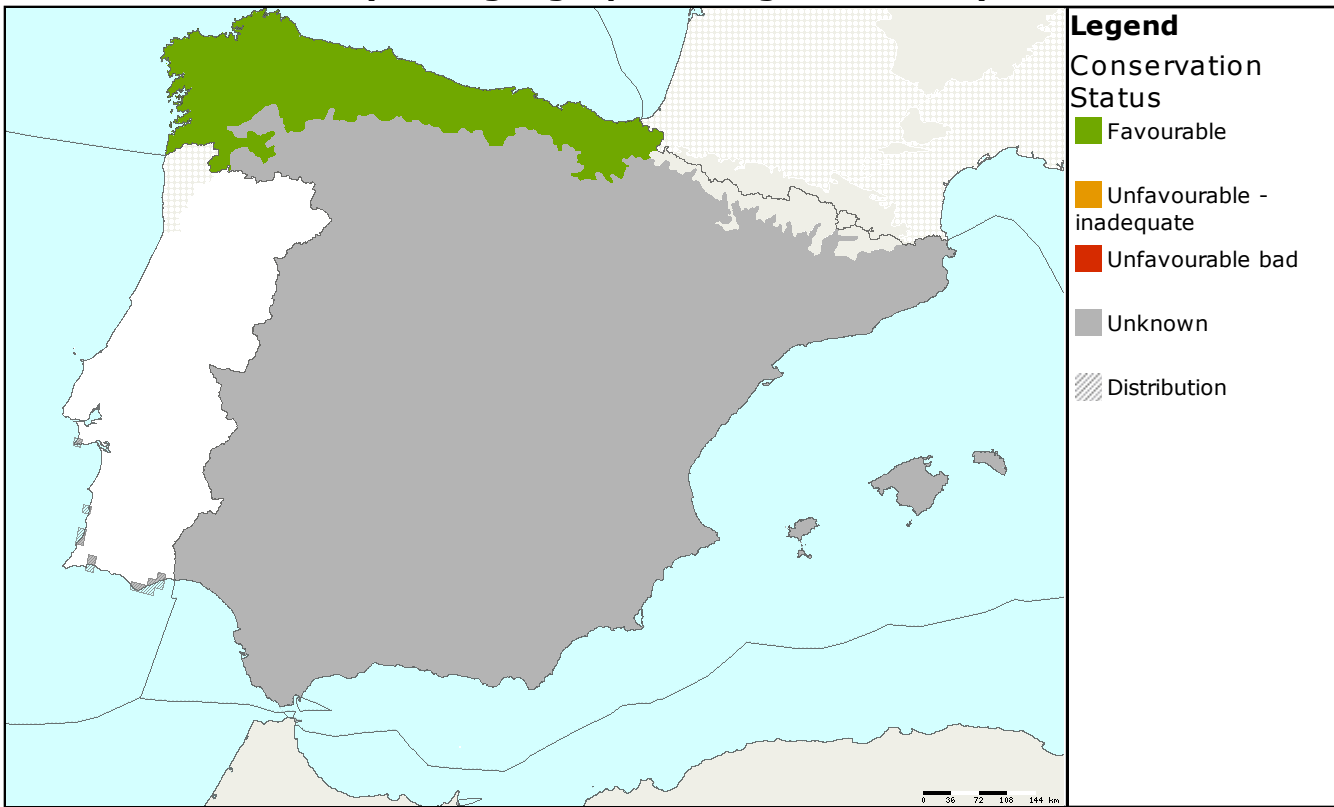

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						> 12 grids	
EU25	ATL						17 loc.	=

The reports for this, in general poorly known, species provided by both countries are incomplete. Conservation status in the Mediterranean biogeographical region was not assessed on the national level, which leads to a conclusion of 'unknown' for this biogeographical region. The conservation status in the Atlantic biogeographical region is 'unfavourable inadequate' which reflects the status of the Future prospect. All other parameters are 'favourable', although data reported are not sufficient to justify these conclusions. Better information is required.

**Assessments of conservation status as reported by Member states  
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	ATL						17 - (17) loc.	=	1
ES	MED						N/A x	N/A	
PT	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
