

Species name: **Limonium spectabile**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MAC**

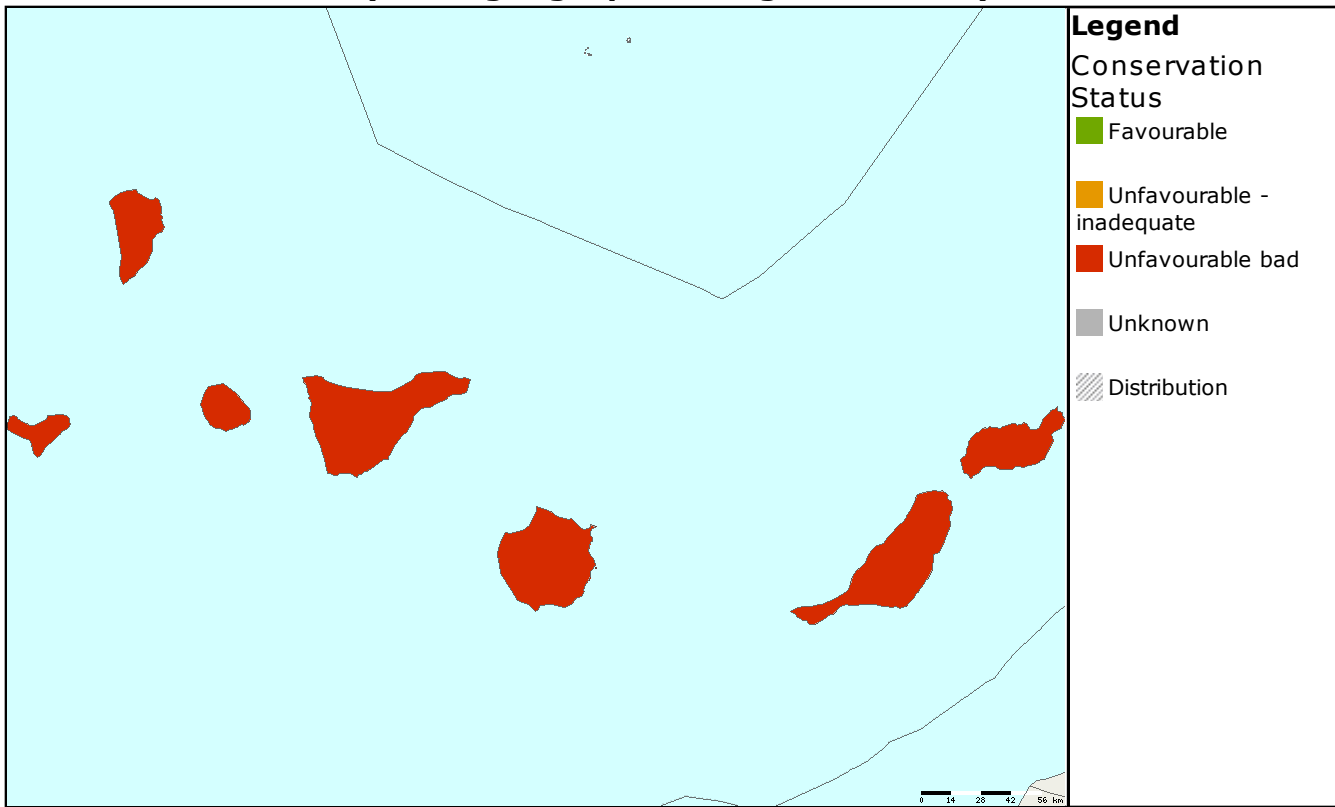

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						160 indiv.	=

MAC: Endemic to Tenerife, Spain 3 populations Unfavourable-bad overall although habitat is Unfavourable-inadequate and improving while future prospects are reported as 'poor' which should correspond to Unfavourable-inadequate Thought that overgrazing is responsible for the small population & lack of expansion 'CR' in Spanish RDB See http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/1038.pdf

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						160 - (160) indiv.	=	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
