

Species name: **Isoetes malinverniana**
Annex: **II, IV**

Species group: **Plants**
Regions: **CON**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	CON						7 loc.	+

CON: Endemic to a small area in Piemonte and Lombardia in northern Italy No information provided concerning habitat although elsewhere noted that this is changing &/or disappearing (http://www2.minambiente.it/sito/settori_azione/scn/docs/qcn/q18/blasi_edem.pdf) suggesting not favourable Better information required to allow a more realistic assessment

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	CON						7 - 7 loc.	+	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
