

Species name: **Marsilea batardae**
Annex: **II, IV**

Species group: **Plants**
Regions: **MED**

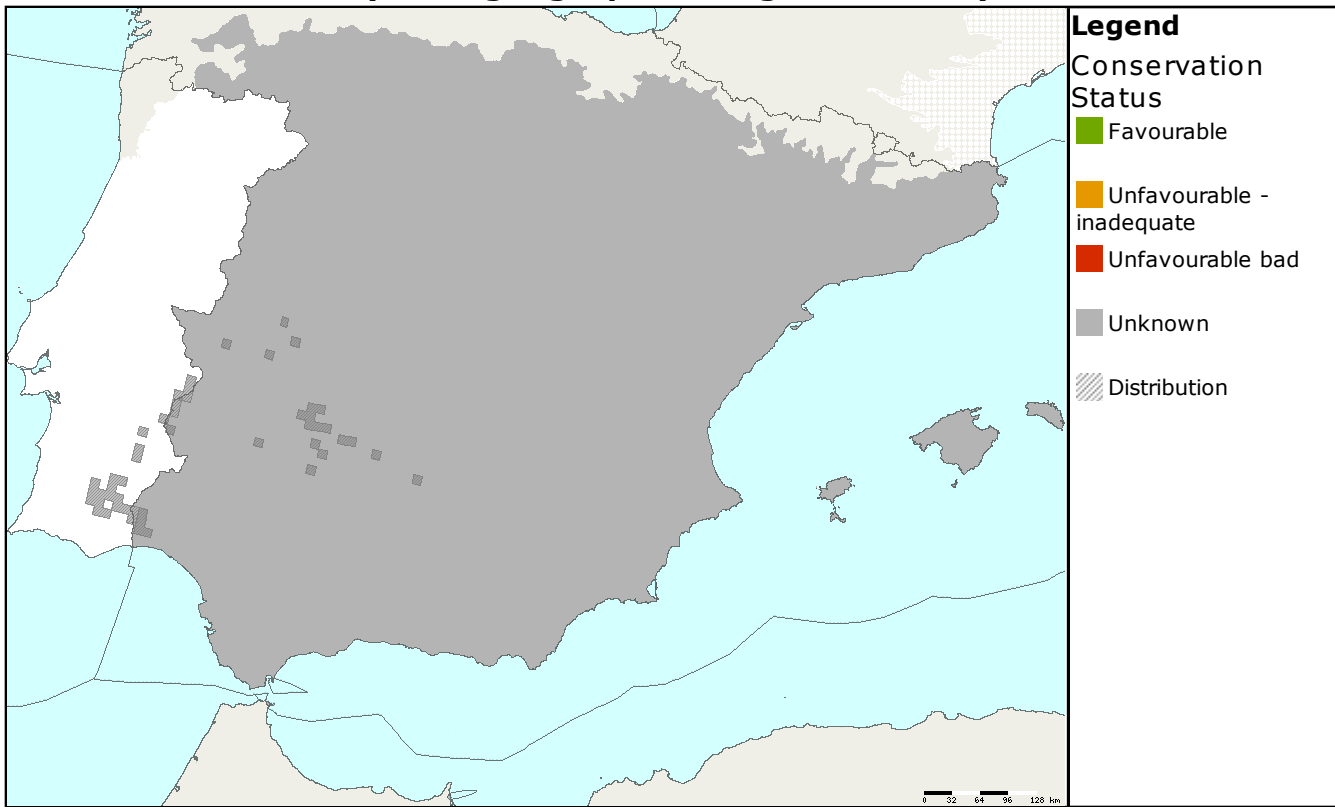

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED							x

Marsilea batardae is a fern endemic to Iberian Peninsula, growing in water habitats. The overall assessment for Mediterranean region is 'unknown but not favourable'. There is very little information reported by both Spain and Portugal. Overall assessment could also be 'unfavourable – inadequate' (indicated by Portugal) or 'unfavourable – bad' according to future prospects in Spain. Better information required.

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MED						115838 - (115838) indiv.	X	3
PT	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
