

Species name: **Lamyropsis microcephala**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MED**

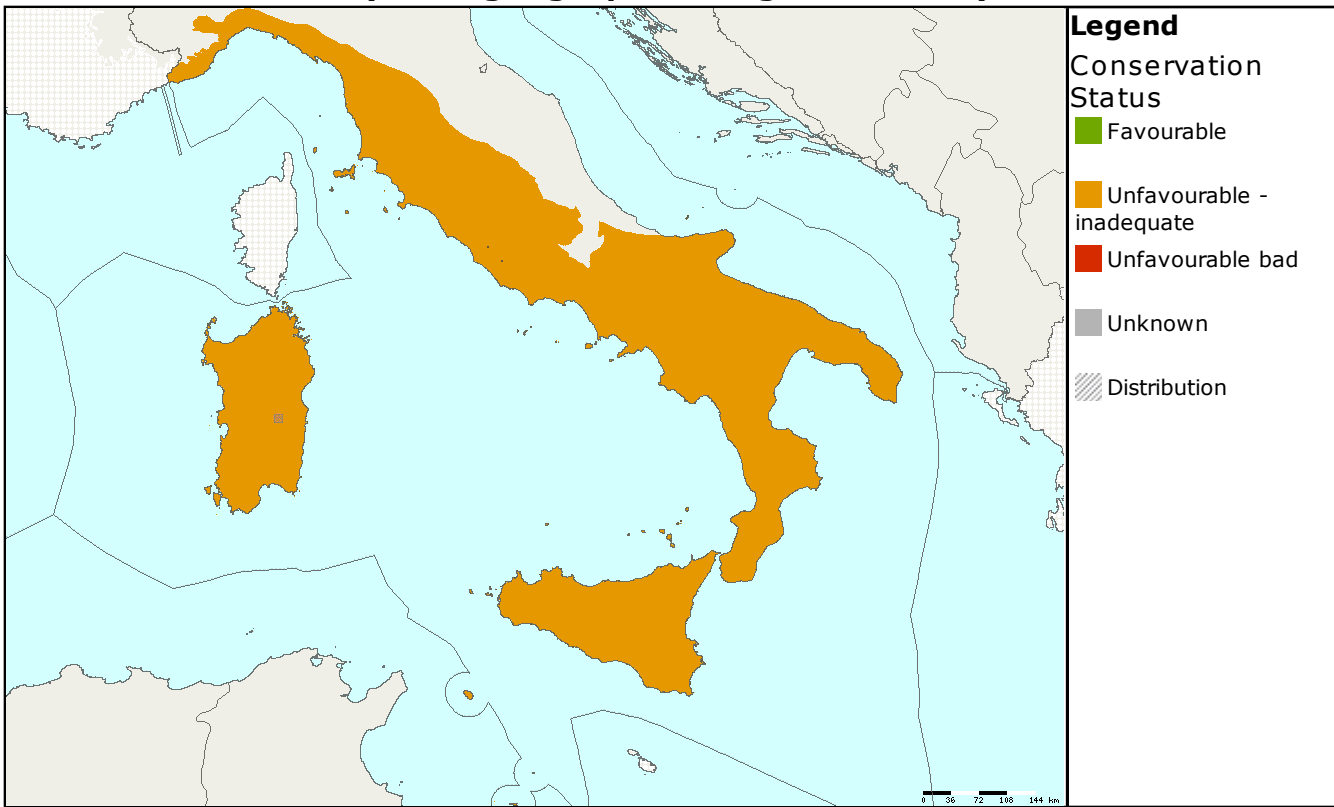

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						2 loc.	=

MED: Endemic to one mountain on Sardinia (Italy) Habitat assessed as 'unknown' but IUCN (see below) note that habitat quality is declining and threatened by a nearby skirun suggesting that the overall assessment might be unfavourable-bad and better information is required Included on IUCN list of 50 most threatened plant spp of Mediterranean islands and considered CRITICALLY ENDANGERED See http://www.iucn.org/THEMES/SSC/our_work/plants/Top50/English/Lamyropsis_microcephala_EN.htm

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
IT	MED						2 - 2 loc.	=	2

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
