

Species name: **Narcissus triandrus**
Annex: **IV**

Species group: **Plants**
Regions: **ATL MED**

Assessments of conservation status at the European level (all biogeographical regions - EU25)

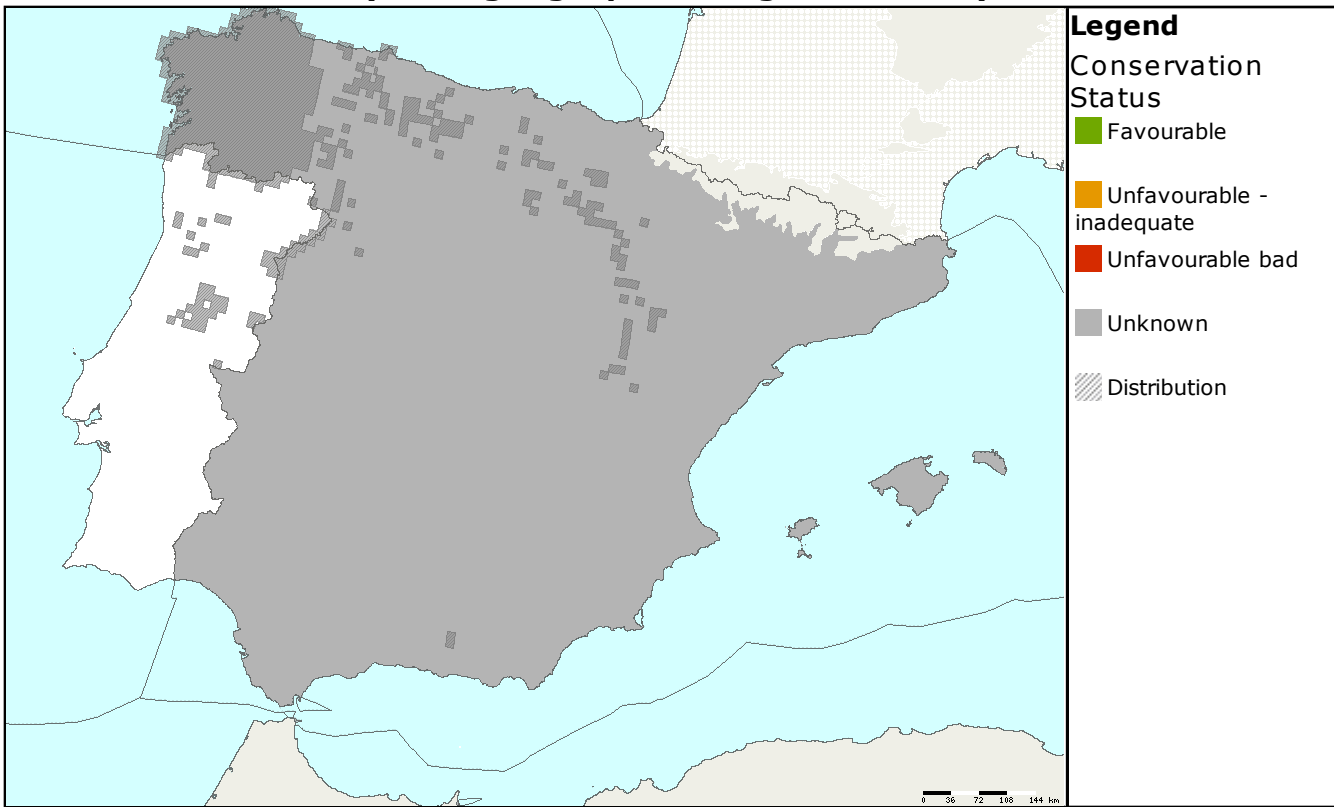

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	ATL						380 grids	
EU25	MED						233 grids	

An Annex IV plant species. *N. triandrus calax*, a subspecies of *N. triandrus* endemic to north-western France is listed in Annex 2. It is evaluated separately. *N. triandrus* occurs apart of France in north-western part of Iberian Peninsula. It was reported by both Spain and Portugal. This species occurs in various types of natural and semi-natural habitats, like grasslands, forests, forest fringes and shrubs.

The reports for this in general poorly known species are incomplete. Conservation status was not assessed at the national level in Portugal although the range and the habitat area are decreasing. The completeness of the data does not allow for other than the 'unknown' conclusion for both the Atlantic and the Mediterranean biogeographical regions.

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	ATL						379 - (379) loc.	=	1
PT	ATL						N/A x	X	
ES	MED						177 - (177) loc.	=	1
PT	MED						N/A x	X	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
