

Species name: **Tanacetum ptarmiciflorum**
 Annex: **II*, IV**

Species group: **Plants**
 Regions: **MAC**

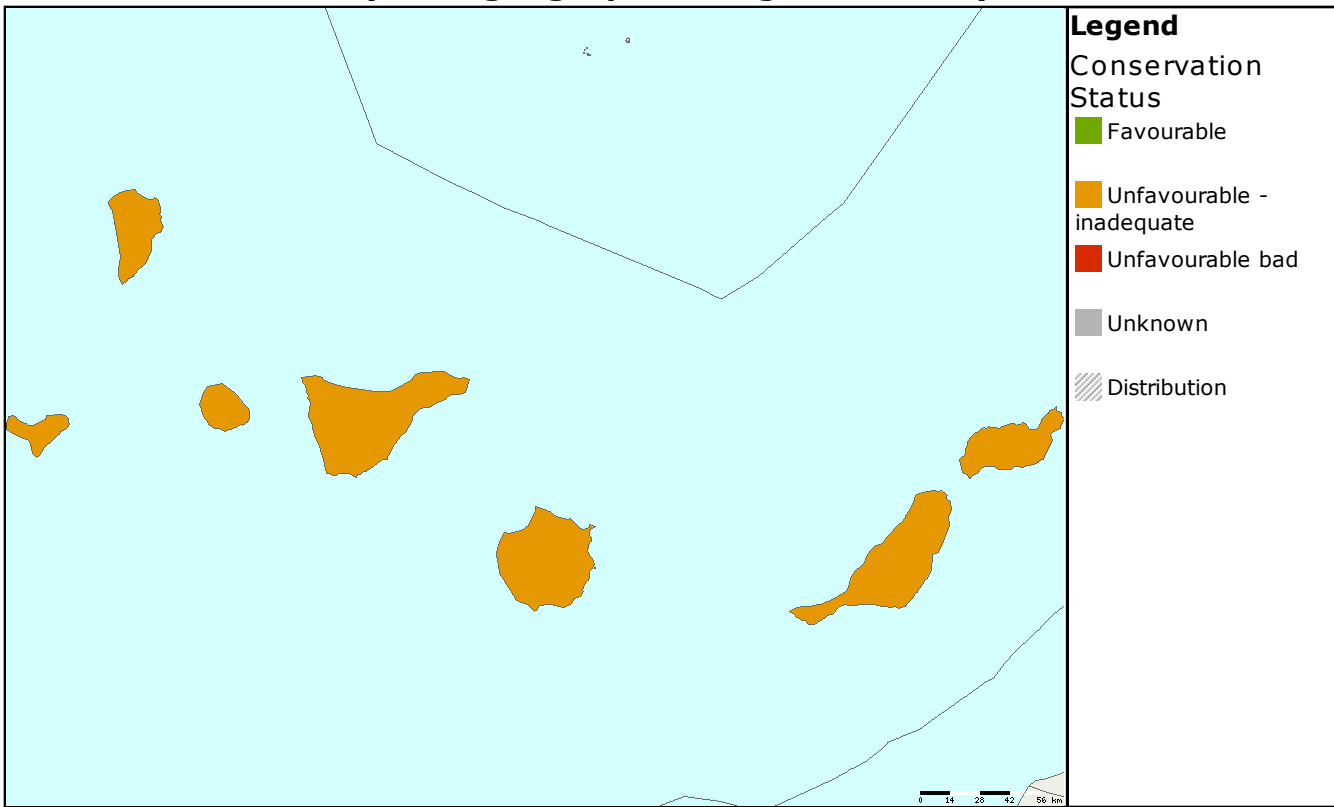

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						479 indiv.	-

MAC: Endemic to Gran Canaria, Spain Five known populations according to the Spanish RDB suggesting the favourable reference population should be approx 1000 individuals (see Spanish report) and the population assessed as unfavourable-bad Assessments of Range and Future prospects are not consistent with the information reported and habitat is 'unknown' Better information required from Spain See http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/425.pdf

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						479 - 479 indiv.	-	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
