

Species name: **Sambucus palmensis**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MAC**

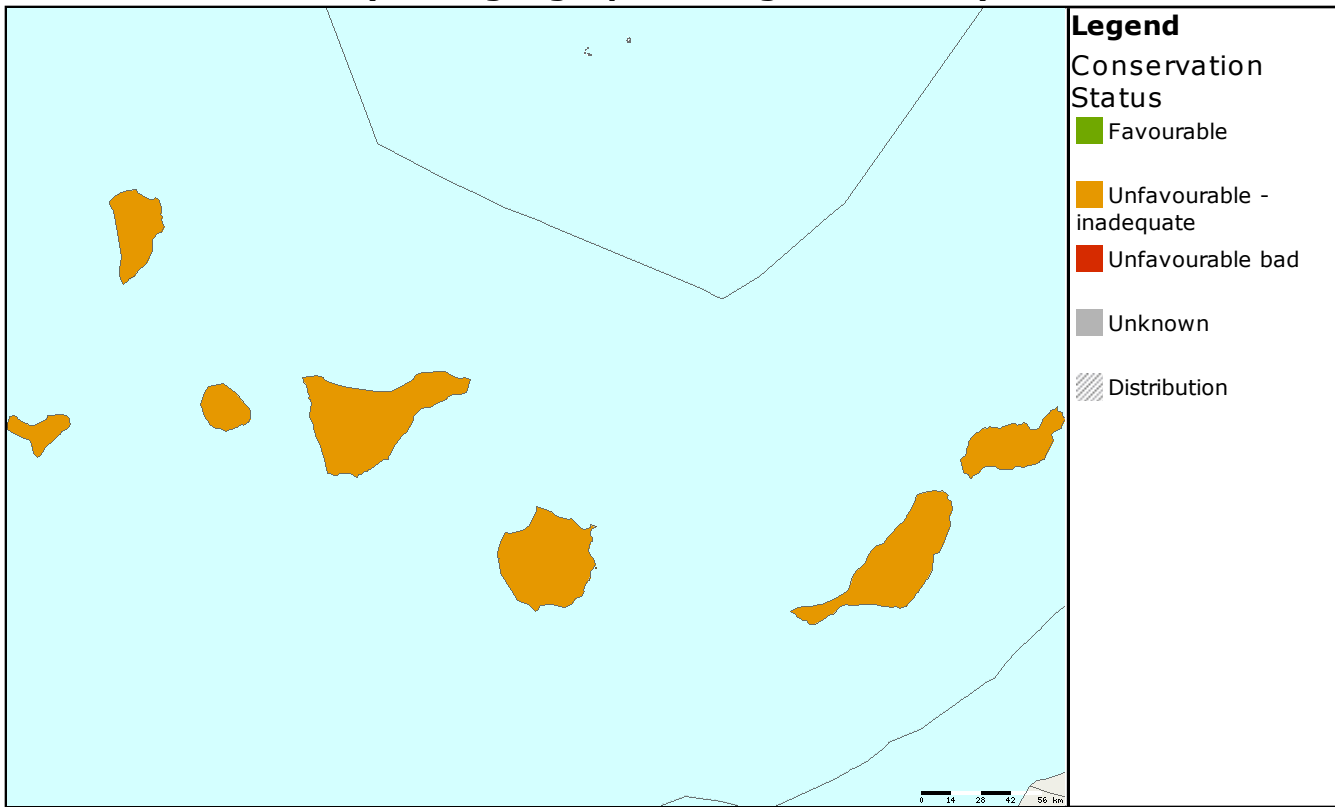

Assessments of conservation status at the European level (all biogeographical regions - EU25)

| MS | Region | Conservation status assessment | | | | | Population size & unit | Population Trend |
|------|--------|--------------------------------|------------|---------|------------------|---------|------------------------|------------------|
| | | Range | Population | Habitat | Future prospects | Overall | | |
| EU25 | MAC | | | | | | 340 indiv. | + |

MAC: Tree endemic to Tenerife, La Gomera, La Palma & Gran Canaria (Canary Islands), Spain. Some 340 individuals in 9 sub populations. Seed produced in abundance but germination virtually absent. There is a restoration project underway on Gomera. Subject of a LIFE project 1998-200 'CR' in the Spanish RDB See http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/141.pdf

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

| MS | Region | Conservation status assessment | | | | | Size&unit | Population trend | Data quality |
|----|--------|--------------------------------|------------|---------|------------------|---------|------------------|------------------|--------------|
| | | Range | Population | Habitat | Future prospects | Overall | | | |
| ES | MAC | | | | | | 340 - 340 indiv. | + | 1 |

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
