

Species name: **Silene velutina**
Annex: **II*, IV**

Species group: **Plants**
Regions: **MED**

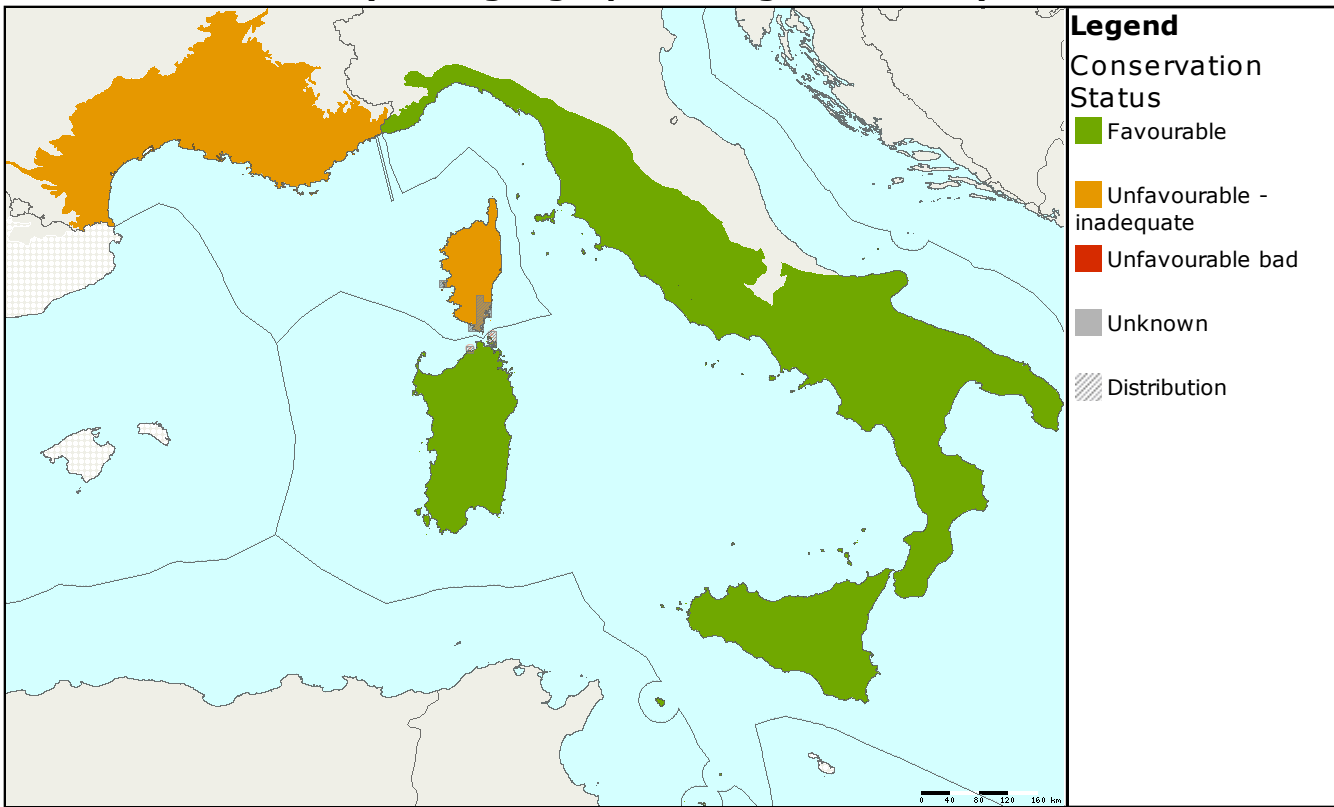

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MED						20-21 loc.	=

Silene velutina is an endemic plant to the coasts of southern Corsica (France) and northern Sardinia (Italy). Its overall status of conservation is "unfavourable-inadequate" due to the poor future prospects parameter reported by France, despite the other individual parameters are reported as "favourable".

Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
FR	MED						14 - 15 loc.	=	1
IT	MED						6 - 6 loc.	=	1

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
