

Species name: **Sorbus teodorii**
 Annex: **II, IV**

Species group: **Plants**
 Regions: **BOR**

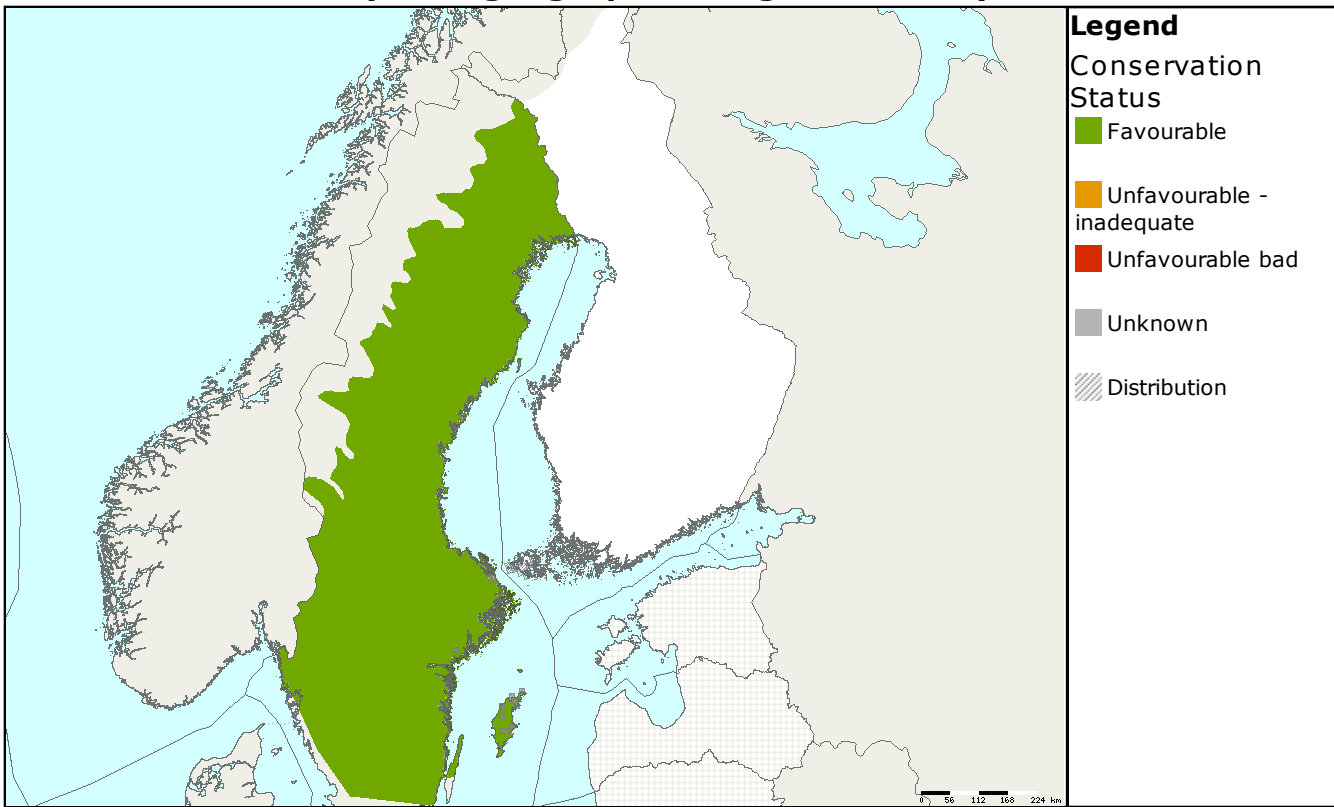

Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	BOR							+

BOR: Tree possibly endemic to Sweden This taxon now appears to be part of *Sorbus meiniichii* the which is more widely distributed in Fennoscandia including Norway The name is here treated as applying to populations on Gotland and a few localities in mainland Sweden See Bolstad, A. M. & Salvesen, P. H. 1999. Biosystematic studies of *Sorbus meinichii* (Rosaceae) at Moster, S. Norway. - Nord. J. Bot. 19: 547-559

**Assessments of conservation status as reported by Member states
(all biogeographical regions - EU25)**

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
SE	BOR						350 - 350 x	+	1
FI	BOR						N/A x	N/A	

Data quality is based on as assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at
