

Species name: **Bencomia sphaerocarpa**  
Annex: **II, IV**

Species group: **Plants**  
Regions: **MAC**

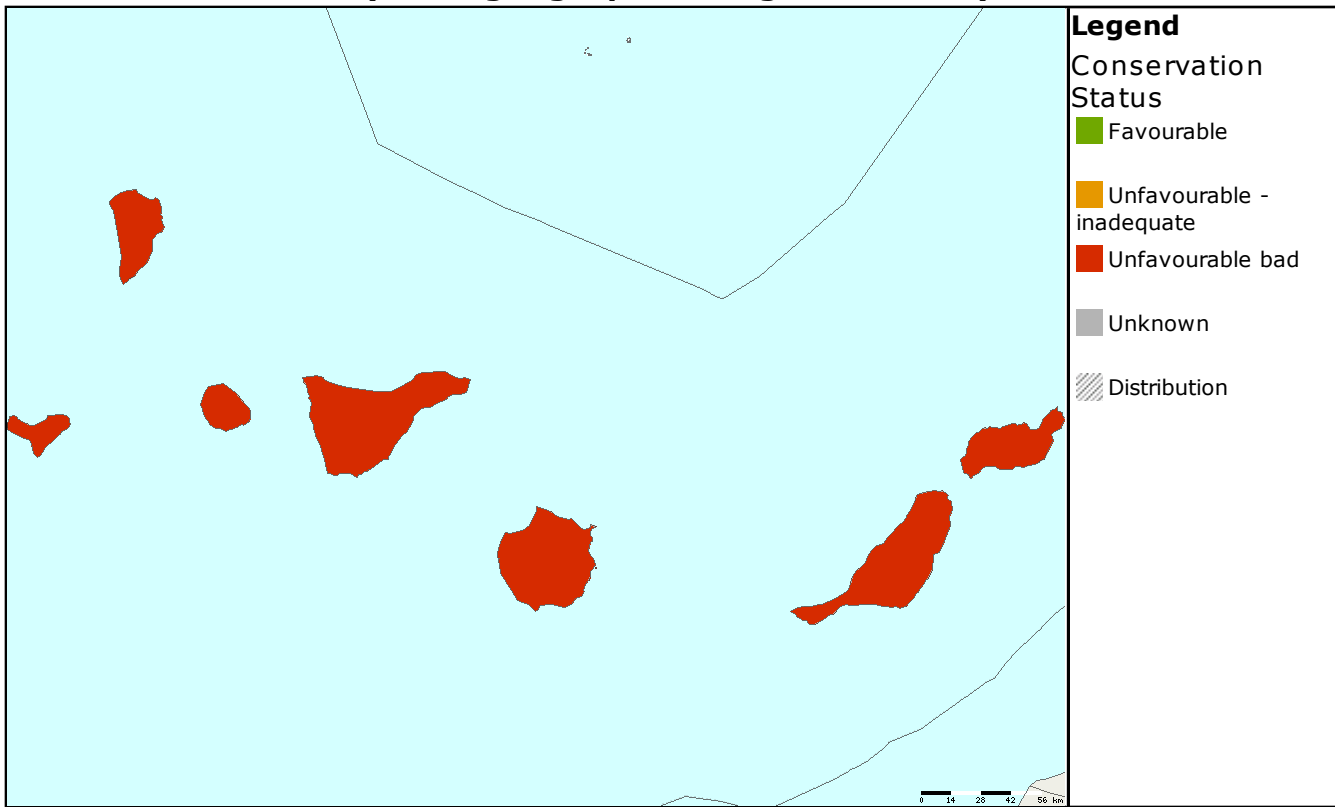

## Assessments of conservation status at the European level (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Population size & unit	Population Trend
		Range	Population	Habitat	Future prospects	Overall		
EU25	MAC						24 indiv.	-

MAC: Unfavourable-bad due to very small population and range. Future prospects inconsistent - noted as 'poor' but assessed as unfavourable-bad. A bush endemic to El Hierro, Spain with a very restricted occurrence (less than 500 x 500 m). CR in Spanish RDB [http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora\\_vascular/pdf/1101.pdf](http://www.mma.es/portal/secciones/biodiversidad/inventarios/inb/flora_vascular/pdf/1101.pdf)

## Assessments of conservation status as reported by Member states (all biogeographical regions - EU25)

MS	Region	Conservation status assessment					Size&unit	Population trend	Data quality
		Range	Population	Habitat	Future prospects	Overall			
ES	MAC						24 - (24) indiv.	-	1

Data quality is based on an assessment by each Member State, 1 = good, 2 = medium, 3 = poor

This information is derived from the Member State national reports submitted to the European Commission under Article 17 of the Habitats Directive in 2007 and covering the period 2001-2006. More detailed information is available at <http://biodiversity.eionet.europa.eu/article17>
