## IMPORTANT NOTE

This QA/QC report is provided for information only. No additional delivery is required from the Member State. The reporting envelope is now closed and you are not able to upload any files.

However, National Data Coordinators are invited to use the Article 17 Consultation Tool to review the national data. The review process allows you to draw attention to new information or to significant errors in the Article 17 report. In doing so, the EU biogeographical assessments will be more accurate.

Please consult the background paper and user manual available at [http://circa.europa.eu/Public/irc/env/monnat/library?l=/habitats\\_reporting/reporting\\_2001-2007/internet\\_consultation&vm=detailed&sb=Title](http://circa.europa.eu/Public/irc/env/monnat/library?l=/habitats_reporting/reporting_2001-2007/internet_consultation&vm=detailed&sb=Title) to see how you can correct possible errors using the web tool (<http://biodiversity.eionet.europa.eu/article17>)

## LIST OF ABBREVIATIONS USED

- cf. Abbreviation for the Latin word *confer*, meaning "compare" or "consult"
- GML Geography Markup Language files submitted by Member States that contain spatial data
- XML Extensible Markup Language files submitted by Member States that contain descriptive data
- MAP Used to indicate the provided GML file (map), or to indicate the map of Natura 2000 site(s)
- \* If used after the filename it indicates the fact that ETC/BD had performed the correction.

Biogeographical regions:

- ALP Alpine
- ATL Atlantic
- BOR Boreal
- CON Continental
- MAC Macaronesia
- MATL Marine Atlantic
- MBAL Marine Baltic
- MED Mediterranean
- MMAC Marine Macaronesian
- MMED Marine Mediterranean
- PAN Pannonian

## GENERAL STATISTICS

## GENERAL REPORT - Data not compliant with QA/QC procedures

### 2. State of designation of Natura 2000

#### Issue 20

- 1 . The number of sites of community importance provided in the general report (1373 in all biogeographical regions and 165 in marine regions) does not match the number of sites in the latest Natura 2000 database (1380) received from the European Commission prior to 31/12/2006.  
No report was expected for marine regions. The sites with marine component or marine sites should have been reported in the adjacent terrestrial regions under the subtitle "Marine".

### 3.1 Management tools - Art. 6(1) - Management plans and Management bodies

#### Issue 31

- 1 . The value indicating the number of sites for which management plans have been adopted (249) is not equal to the number of sites listed in the table (226). The sites for which management plan titles were given in the field "Title of comprehensive management plan and year adopted" were considered as the sites with adopted management plans. Site ES0000053 was listed twice each time with the different name, SIERRA DE HORNACHUELOS and SIERRA NORTE.  
The value indicating the number of sites with management plan in preparation (67) is not equal to the number of sites listed in the table (59). The value indicating the number of sites with management bodies (69) is not equal to the number of sites listed in the table (71).

### 3.2 Management tools - Art. 6(1) - Other territorial planning instruments

#### Issue 32

- 1 . The value indicating the number of sites for which nature conservation objectives have been included in relevant territorial planning instrument (229) is not equal to the number of sites listed in the table (214).

### 3.3 Management tools - Art. 6(1) - Non-territorial planning instruments

#### Issue 33

- 1 . The titles of some of the instruments noted in this section (Forestry plans) seem to refer to territorial planning. This type of instruments should be included in the section 3.2 "Other territorial planning instruments".

### 4. Conservation measures - Art. 6(1) - and evaluation of their impact on the conservation status - Art. 17(1)

#### Issue 40

- 1 . In this section the general description of site related conservation measures under Article 6(1) was expected. Mainly the measures of species conservation were mentioned here. The relationship of the measures provided to the provisions under Article 6(1) of the Directive is not clear. The measures under this article should concern Natura 2000 sites.

### 6. Measures taken in relation to approval of plans and projects - Art. 6(3,4)

#### Issue 60

- 1 . The value indicating the number of projects for which compensation measures were necessary (44) is not equal to the number of projects listed in the table (40). For the sites ES5233011, ES5233008 and ES5213054 project type was not specified.

### 10.1 Measures taken to ensure the protection of species (Arts. 12 to 16) - Requisite measures taken to establish a system of strict protection of Annex IV species

#### Issue 101

- 1 . *Lynx pardina*, *Rannunculus weyleri*, *Bupestris splendens*, *Deremochelys coriacea*, *Eretmochelys imbricata*, *Podarcis pytyusensis*, *Todarida teniotis* *Chiglossa lusitanica* not correct species name.  
*Ilex aquifolium*, *Dreissena polymorpha* are not Habitats Directive species. *Aphanius iberus* and *Austropotamobius pallipes* are not Annex IV species.

## 10.2 Measures taken to ensure the protection of species (Arts. 12 to 16) - Control systems for the incidental capture and killing of species (Art. 12(4))

*Issue 102*

- 1 . No answer was given for "How does the control system ensure that there will not be a negative impact on the species?" and "Species name" for some of the measures listed in the table.

*Chondrostoma polilepys, Mustela arminia, Callimorpha quadripunctaria:* species names are not correct. *Alosa alosa, Cobitis taenia, Chondrostoma polilepys, Genetta genetta, Mustela putorius, Callimorpha quadripunctaria* are not Annex IV species. *Martes foina, Meles meles, Sciurus vulgaris, Erinaceus europaeus* are not Habitats Directive species.

## 10.3 Measures taken to ensure the protection of species (Arts. 12 to 16) - General main measures established to deal with the taking/exploitation in the wild of specimens of wild species of Annex V (Art. 14)

*Issue 103*

- 1 . *Capra pirenaica* species name is not correct.

## 10.4 Measures taken to ensure the protection of species (Arts. 12 to 16) - Types of controls to ensure that indiscriminate means of capture and killing of the species of Annex IVa) and Va) are not used (Art. 15)

*Issue 104*

- 1 . No answer was given for "Species name" for some of the measures listed in the table.

# HABITATS REPORTING - Errors detected by QA/QC procedure

## 1.2 Map of Habitat distribution

*Issue 13740* ***The spatial information occurs in regions outside those reported in the XML***

- 1 . map-distribution-1170.gml (cf. MED: MAP)
- 2 . map-distribution-1410.gml (cf. ATL: MAP)

## 2.3.5 Habitat range trend magnitude - optional

*Issue 14830* ***Trend magnitude must be a positive number, direction of the trend is given in the trend field***

- 1 . habitatype-2110.xml (cf. MED: 1995-2006)
- 2 . habitatype-2250.xml (cf. MED: 1995-2006)

## 2.4.6 Habitat area trend magnitude

*Issue 16360* ***Magnitude should not be zero if the trend is not stable, should not be a number different from 0 if the trend is stable and should not have a value if the trend is unknown***

- 1 . habitatype-1110.xml (cf. MAC: trend: X; magnitude: 0)
- 2 . habitatype-1150.xml (cf. MED: trend: X; magnitude: 0)

### 2.3.5

#### Species range trend magnitude - optional

*Issue 8260* **Magnitude should not be zero if the trend is not stable, should not be a number different from 0 if the trend is stable and should not have a value if the trend is unknown**

- 1 . species-ursus-arctos.xml (cf. ATL: trend: =; magnitude: 31.2)

## 2.7.2 Favourable reference species population

*Issue 12710 Reference value usually should not be lower than actual minimum value (or than maximum value if minimum was not provided). If lower values were correctly provided, an explanation is needed in the "complementary other information" field. If qualifiers "More than" or "Much more than" were used for a reference value that is lower than the actual value, this make the sub-conclusion doubtful according to Addendum #2 of the Explanatory Notes and Guidelines*

**2.3.1 Surface range of the habitat**

*Issue 14350 Range in the XML file shows a difference of more than 5 % from the range calculated from the GML file in the corresponding biogeographical region (not buffered for calculation of minimum values and buffered by 15 km for maximum values). This discrepancy can be due to spatial data being generalized during creation of the GML. NOTE: As range maps were not provided, the test was performed on distribution maps, but is still relevant as the range should be always larger than the distribution.*

### 2.3.1 Surface range of the species

*Issue 7750* **Range in the XML file shows a difference of more than 5 % from the range calculated from the GML file in the corresponding biogeographical region (not buffered for calculation of minimum values and buffered by 15 km for maximum values). This discrepancy can be due to spatial data being generalized during creation of the GML. NOTE: As range maps were not provided, the test was performed on distribution maps, but is still relevant as the range should be always larger than the distribution.**

### 2.3.6 Species range trend period

*Issue 8450 The end of range trend period differs by two years or more from date (or end of period) of range*

*determination. The range area and its trend are most probably not connected, as being estimated from different datasets. This makes the sub-conclusion doubtful*
